

FAST CAPTURING, SORTING, AND AUTOMATION

Companies receive documents from a variety of channels and in multiple formats, including files from supported scanners and MFPs, watched folders, email attachments, and the cloud. Each might include crucial business information that must be integrated into the company's systems to help with business continuity and/or kick-start further document processes and workflows.

IRISPowerscan™ V12 is an all-in-one capture and classification software platform that users can rely on to extract, integrate, and export information to compatible third-party and cloud-based applications and other locations.[1] This solution's 64-bit architecture, coupled with advanced features such as OCR and image cleanup, provide users with the tools needed to help them capture, process, and route their jobs quickly and easily.

Key Benefits

Increase Productivity
Helps provide users with the ability to process jobs efficiently while boosting an organization's ability to transfer data across compatible third-party and cloud applications.[1]

Save Time for High-Value Tasks
Capture and classify data quickly with IRISPowerscan's 64-bit architecture, allowing users to focus on high-value responsibilities.

Help Limit Manual Processing Errors
Minimize potential errors and costs associated with manual data entry using powerful verification technologies—including one-click verification—that can help provide reliable information.

SCAN AND IMPORT

Import documents from supported scanners and MFPs, watched folders, email attachments (with an optional add-on), and compatible applications.[1]

ADVANCED SORTING

Sort incoming documents using a variety of techniques, including bar codes, patch codes, OCR/ICR zones, keywords, color detection, and regular expression. IRISPowerscan™ V12 also features a powerful layout recognition technology known as IRISFingerprint™, which can learn the appearance of various document types and perform identification without using text, labels, or bar codes.

HIGH-ACCURACY INDEXING

Extracts the key information needed using a variety of recognition technologies, such as OCR, ICR, bar codes, patch codes, and more.

ONE-CLICK VERIFICATION

Confirm that captured information is reliable before exporting to compatible third-party and cloud applications.[1] The user interface includes easy-to-use tools and techniques, including drag-and-drop OCR, keyboard shortcuts, and auto-zooming, all to carry out the verification job quickly and efficiently.

OCR AND PDF COMPRESSION

Recognize text from 139 languages and dialects.[2] Convert documents into a variety of formats, including PDF/A, hypercompressed PDF (with an optional add-on), XML, CSV, TIFF (single or multipage), BMP, JPEG, and PNG.

EXPORT

Export and route documents as searchable files to compatible system folders, email, printers, IRIS Central-Management feature, and many third-party applications via the IRISConnect™ Toolbox.[3,4] IRISConnect™[3,4] provides connectivity to one of the following destinations: SharePoint™, Therefore™, FTP, ODBC, CMIS, Box™, Dropbox™, Google Drive™, OneDrive for Business™, or Laserfiche®.[1] Connectivity to other compatible software applications can be easily configured with the IRISConnect™ Toolbox.[3,4]

TEXT FINDER

Easily search for data located near a keyword on a page with the help of IRISPowerscan's Text Finder Tool and its Regular Expression Generator.

POWER REPORTING

Get valuable insights about IRISPowerscan activities, on demand or on a monthly basis[5], to better understand your productivity.

HEADER, FOOTER, AND BATES STAMPING

Add as many header, footer, and bates as desired[6] and easily position them on the required positions (e.g., bottom right, top left).

PDF META DATA

Be efficient and enjoy the power of adding PDF Meta Data dynamically. Get detailed information about documents, such as indexes or capture properties.
