

uniFLOW Online Multi-vendor Compatibility

No matter the size or complexity of your print environment, uniFLOW Online delivers unmatched flexibility. In mixed-fleet environments, a number of manufacturers integrate seamlessly with the embedded uniFLOW applet, while others connect via a uniFLOW Release Station—ensuring consistent security and functionality across your entire fleet.

This means you can standardize workflows, enforce enterprise-level security policies, and deliver a true "My Print Anywhere" experience for every user. Whether printing from the office, home, or on the go, uniFLOW Online keeps your documents secure and your processes simple.

Why choose uniFLOW Online?

- Universal compatibility across mixed fleets
- Secure print release with user authentication
- Centralized control for printing, scanning, copying, and faxing
- Cloud-based management for reduced IT overhead
- Actionable reporting and tracking to optimize costs and compliance

A CLOUD-BASED PRINT MANAGEMENT SOLUTION

Secure Printing: With uniFLOW Online, your print jobs are protected. Send documents to a central queue and release them only after authenticating at the device—ensuring sensitive information never falls into the wrong hands. This secure print release functionality help reduce the risk of unattended documents and reinforces confidentiality across your organization. Backed by industry recognized security and compliance standards, uniFLOW Online helps keep your data safe while streamlining workflows.

Document Scanning: When operating supported Canon multi-functional devices, scanning documents with uniFLOW Online is easier than ever. Enjoy a sleek, intuitive interface that lets you scan directly from supported devices with just a few clicks. Thanks to single sign-on, you can securely send scans to multiple destinations—your desktop PC, local network folders, email via Exchange Online, or even straight to your inbox. Fast, flexible, and designed to keep you productive.*

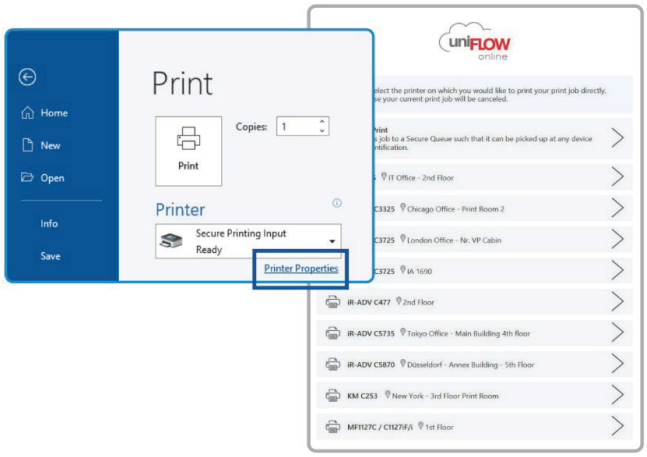
Tracking and Reporting: Administrators can monitor printing, copying, faxing, and scanning expenses, enabling accurate cost allocation to individual users. The comprehensive dashboard delivers a clear overview of the organization's print, scan, and copy environment, including detailed user and device summaries. Additionally, administrators can create projects or cases within the cost center menu, allowing users to assign their print, scan, or copy charges to the appropriate category.

Cloud Infrastructure: Say goodbye to on-premises servers with uniFLOW Online. All configuration and management happen securely in the cloud, eliminating the need for local infrastructure and reducing IT overhead. Backed by enterprise-grade encryption and compliance standards, uniFLOW Online ensures your data is protected while delivering a streamlined, scalable solution.

*Document Scanning only available on supported Canon devices.

PRINT DIRECT WITH UNIVERSAL OUTPUT QUEUE

uniFLOW Online Universal Output Queue helps to reduce the number of print drivers that organizations must manage within their print environments, by enabling direct printing to compatible devices without the need to install device-specific drivers. This is made possible by enhancing the capabilities of the uniFLOW SmartClient and uniFLOW Universal Driver. With uniFLOW Online Universal Output Queue, devices can be integrated as “network printers”. This helps to enable direct printing using a single driver and can allow users to direct print from any multi-vendor print device.



UNIVERSAL OUTPUT QUEUE BENEFITS

- **Boost Efficiency**
- **Save Time**
- **End-User Flexibility**
- **Easy Integration**
- **Intuitive User Workflows**

SECURE RELEASE

Using a Release Station or Embedded Applet

The uniFLOW Release Station takes over device access control and secure print functionality and can be connected to most devices. The release station is not always required as some manufacturers have the uniFLOW Online applet embedded. For the manufacturers that do not have the embedded applet, the release station functions as the device user interface for uniFLOW Online. As a fully integrated solution with a card reader, touchscreen, and embedded software, the uniFLOW Release Station provides a single platform for businesses' secure and mobile printing requirements regardless of the type of device being used. Businesses benefit from the flexibility of true "My Print Anywhere" output and increased document security across all platforms.

Current manufacturers that support the uniFLOW Online embedded applet include:

- Canon
- Sharp
- Lexmark
- HP

Using Mobile Release with QR Code Identification

Customers also have the option for secure release—without a release station—with mobile release. Users simply print out the mobile release QR code and individually place it on the devices. Easily scan the QR code at the device with smartphones or tablets and release jobs. For the full user interface experience, a release station is required.

MOBILE AND GUEST PRINTING

Send print jobs from anywhere. Regardless of location or manufacturer device, uniFLOW Online allows users to utilize their smartphones or tablets to print documents. More than 40 document and image file types can be converted. This allows documents to be printed quickly on the go, just in time for the next meeting. There are many ways to use mobile and guest printing with uniFLOW Online.

uniFLOW Online Print & Scan App

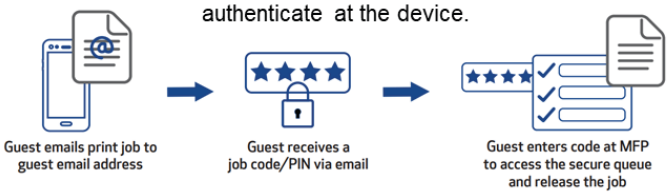
Submit print jobs through the mobile app by uploading a picture. Release print jobs securely by scanning a QR code displayed on the user interface for touchless print operation.

Email Printing

After emailing a print job to the device from an authorized email address, the job will appear in a user's secure print queue. Once authenticated, the user sees a list of print jobs.

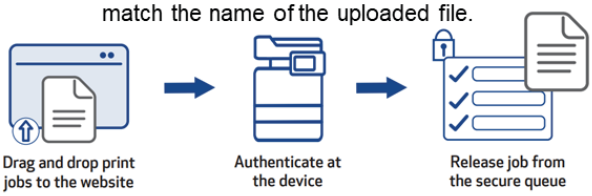
Mobile Printing for Guests

Provides a secure print email address for guests. After a print job is sent, users receive an email with instructions on how to retrieve their job using a secure temporary job code used to authenticate at the device.



Web Upload

Mobile workers can also submit print jobs by uploading documents to a secure website. The uploaded files will be added to their personal print queue and the job name will match the name of the uploaded file.



Printing in Public Spaces

In public places like university libraries or co-working spaces, users often need to print from a shared PC. With uniFLOW Online, customers can now easily utilize printing and copying services in publicly accessible areas with minimal administrative effort.

Users can now self-register using their email.

To print, a pop-up will appear prompting for an email address.

After entering your email, the job will be sent to uniFLOW Online and a confirmation pop up will display.

The print job can be retrieved at the device after authentication.

uniFLOW ONLINE SUBSCRIPTIONS

uniFLOW Online – Cloud Print & Scan: Cloud Print & Scan enables users to print confidential documents securely and offers additional features such as mobile printing, My Print Anywhere, and the Universal Output Queue. In addition, this solution includes basic scanning capabilities that allow users to capture documents and distribute them to multiple destinations. With Cloud Print & Scan, customers receive a subscription package that provides central control of printing, scanning, copying, and faxing.

uniFLOW Online - Cloud Image Processing: Cloud Image Processing adds robust scanning features designed to optimize processes for scanned documents by directly sending them to a variety of supported scan destinations with enhanced image quality, compression, and document security.
