**NOTE:**

1. When preparing door for DBLC function, omit drilling of .625 Dia. turn knob hole. (Inside) drill a 1.250 Dia. cylinder hole instead, using same center line as outside cylinder hole.

2. Drill all holes half way through door unless otherwise specified.

3. For additional lock and door cutout dimensions, see appropriate lock template.

4. Installation plates are not required for this trim.
