**Baldwin Presents Premium Hardware with Home Connect™**  
*- Keyless Entry marries legendary design and craftsmanship with cutting-edge technology -*

Lake Forest, CA (August 25, 2010) – Homeowners can now combine stylish Baldwin door hardware with the latest in functional innovation. Baldwin Hardware introduces its latest security advancement, Keyless Entry with Home Connect™.

Baldwin's Keyless Entry Deadbolt uses Home Connect™ technology and the ZigBee Pro wireless protocol to wirelessly communicate with other devices in the home so that locking or unlocking the door ties into other events, such as adjusting lighting, climate control, and music. Using a Web-enabled device, homeowners can check the status of their locks, lock/unlock their home remotely, and receive a text or e-mail message when a lock is accessed.

While keyless locks are not new, Baldwin's version sets a new benchmark for the market. Baldwin's keyless lock features superior styling and construction, as well as the company's legendary Lifetime Finish. Unlike others on the market, Baldwin's keyless lock features a revolutionary self-aligning, tapered, motorized deadbolt; advanced design for ease of use and programming; customizable features; and trouble-free integration with other home automation components. With access codes up to eight digits long protected by 128-bit encryption, Baldwin's Keyless Entry with Home Connect™ ensures true security.

-more-

The set also features one-touch locking and two customizable access codes—one for family, one for temporary access. Other features include a backlit keypad, incorrect code lockout, automatic door locking, audible signal for activation, lock/unlock LED indicator, and low battery indicator. Baldwin's Keyless Entry with Home Connect™ is easy to install in a standard door, and no hard wiring is required.

Baldwin is offering two keyless entry styles: the contemporary Soho and the more traditional or rustic Boulder. Each comes in four finishes to coordinate with any home style and, unique to the segment, Baldwin is offering both sectional and 3/4 escutcheon handlesets with the locks.

All styles of Baldwin Keyless Entry with Home Connect™ are available now. Locate a retailer at [Control4.com](http://Control4.com).\*\*

\*\*ROB: We need to discuss this. We would like to include a paragraph that says something like:

Baldwin's Keyless Entry with Home Connect™ is currently compatible with Control 4 home automation systems. Locate a retailer at [Control4.com](http://Control4.com). Home Connect™ is adding new home automation partners regularly. Contact Home Connect™ at \*\*\* to learn if Baldwin's Keyless Entry is compatible with your system.

Baldwin Hardware manufactures an extensive family of superior architectural and decorative products for residential and commercial use in a variety of finishes, including its proprietary *Lifetime Finish*™.
