

Door Hole Template

1. Fold Template on dashed line. Use scissors to cut around the solid line of the Template & remove outer strip of paper.
2. Determine desired location of hole-opening on bottom of door.
3. Position Template so that the folded dashed line aligns with bottom of door.
4. Carefully trace hole outline on door. -
5. Darken hole outline on door so that it can be easily seen when sawing.
6. Careully saw around hole outline.
Note: You may want to cover the saw base with masking tape to avoid scratching the door surface.
