CUSTOM FAUCET SOLUTIONS

With 100 years of Design and Manufacturing expertise, our team is excited for you to Discover...

**PFISTER**<sup>TM</sup>  
CUSTOM FAUCET SOLUTIONS

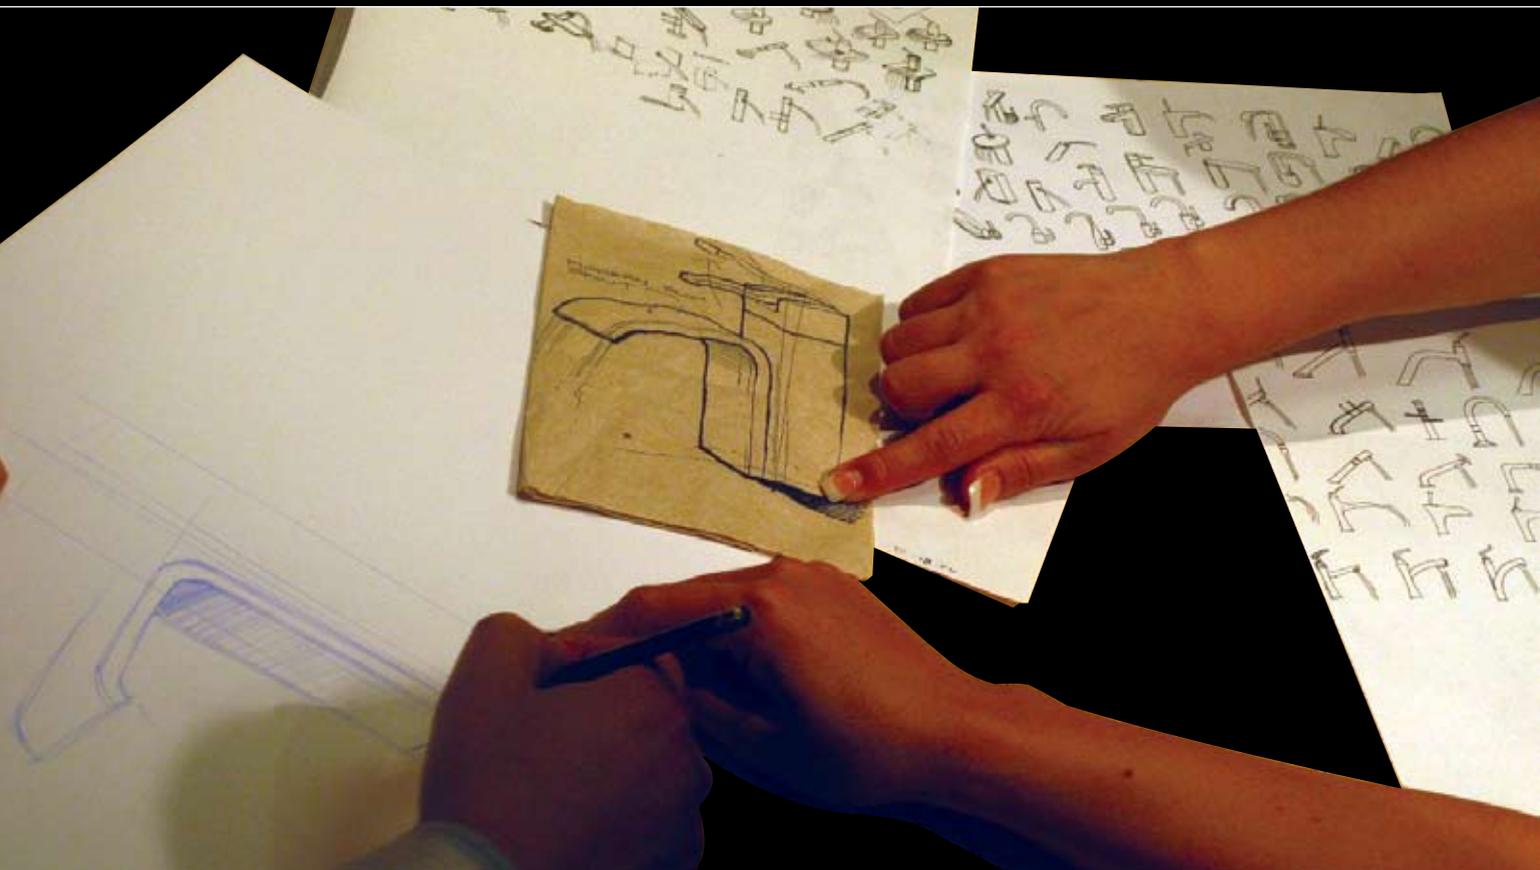

your  
VISION

## our EXPERTISE

From Sketch to Production, our experts can transform your inspiration and deliver a custom faucet solution for your next project using our proven 4-Step design process.

# our

## OUR DESIGNERS:

Our talented team of designers, based in Southern California, are disciplined in traditional applied art and integrate state-of-the-art technology to capture your design vision.

## OUR PROCESS:

From sketch to final product, our team works collaboratively to ensure your vision is delivered, precisely.

# TEAM

your

**VISION**

## FOUR **STEP** DESIGN **PROCESS**

Through a collaborative 4-Step process,  
our team can deliver custom design  
solutions in as little as 8 weeks.

1.  
**INTENT**

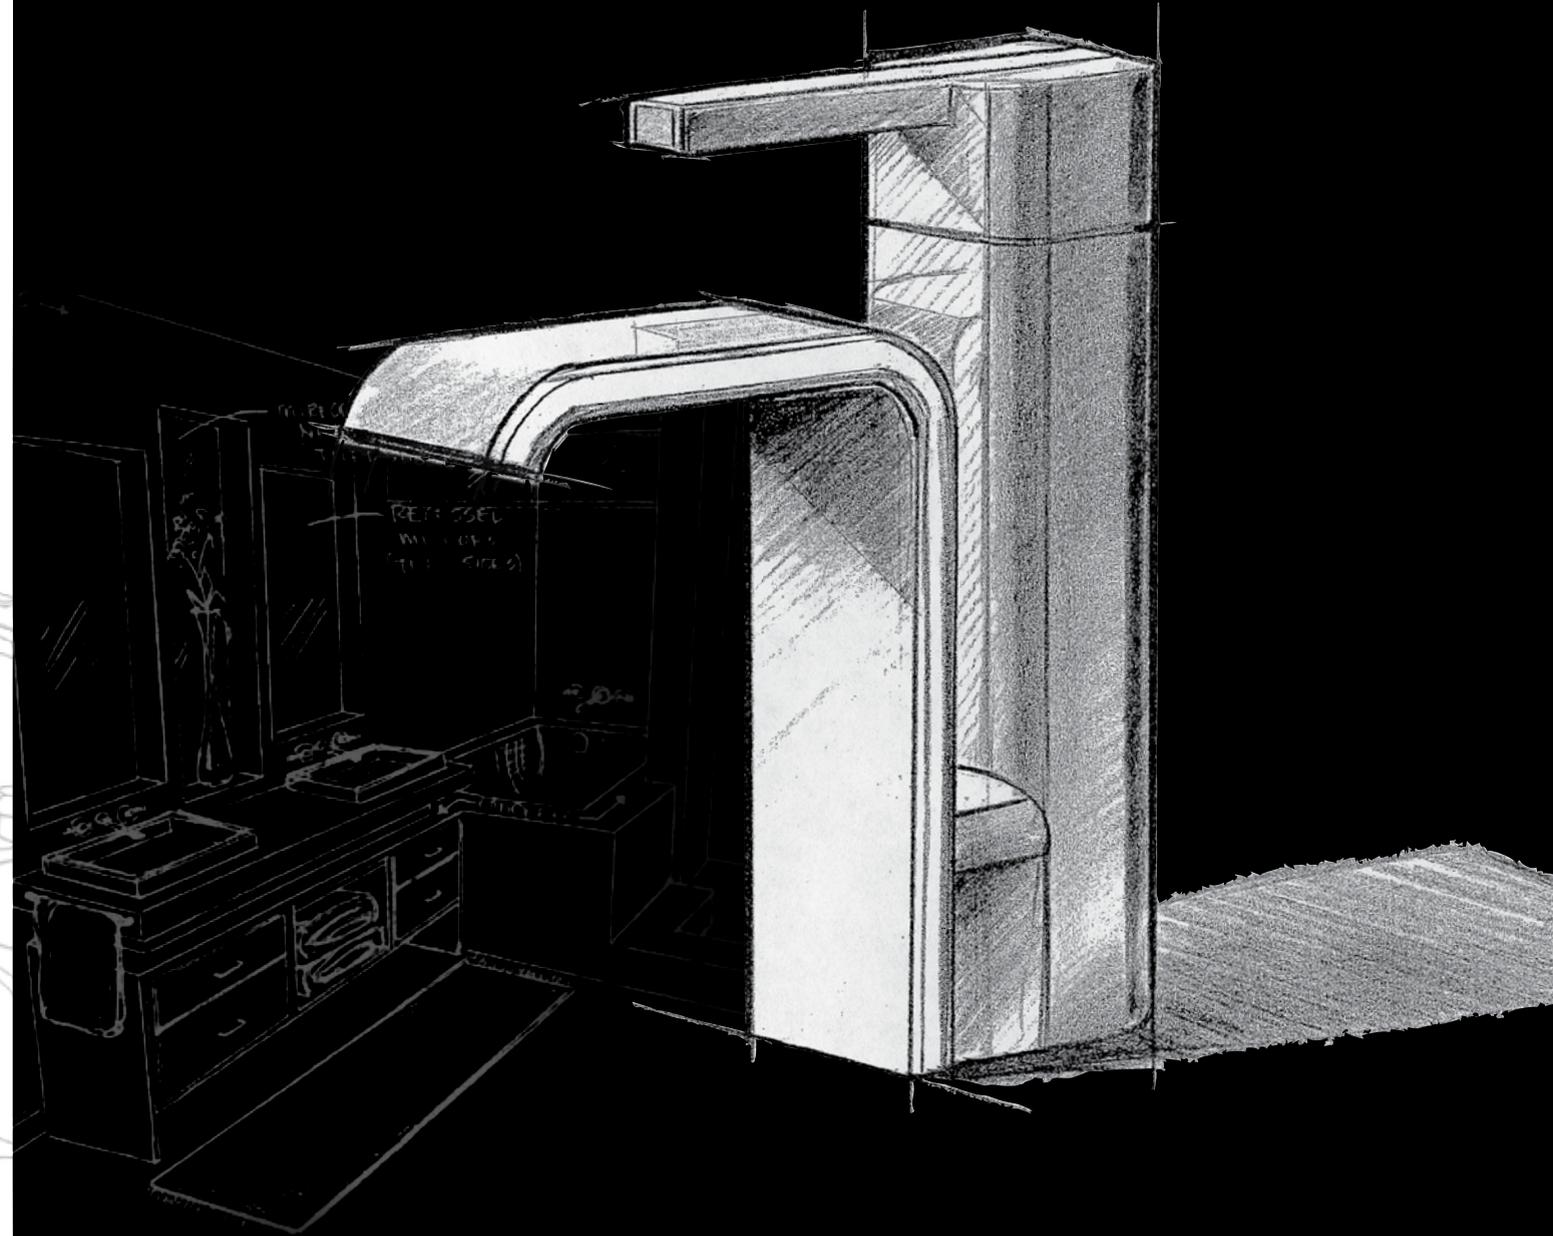

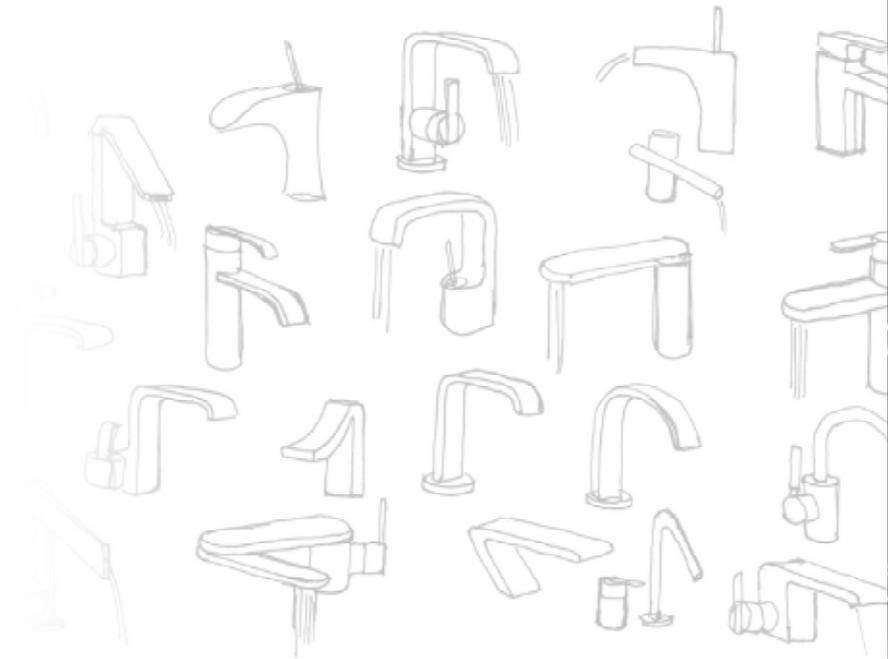

2.  
**DESIGN**

3.  
**ENGINEER**

4.  
**PRODUCE**

1. INTENT  
(1 week)

Collaboration begins by reviewing architectural details of the project, rendering of a guest room, or even rough sketches to define design intent.

2.  
**DESIGN**  
(2 weeks)

From sketch to digital renderings, our designers use state-of-the-art equipment to develop the shape and form of your design.

Based on original design intent, the PFISTER™ Industrial Design Team will provide 10-12 faucet renderings for your review.

3.  
**ENGINEER**  
(1 week)

From three (3) selected design renderings, our engineering team will develop 3-D models integrating our proven valve technology to establish functionality.

**OUR** priority is to ensure **YOUR** design intent is maintained throughout entire process.

4.  
**PRODUCE**  
(4 weeks)

Using state-of-the-art 3-D printers, rapid prototypes are developed to confirm the scale and proportionality for final design selection.

Once the final design is approved, the PFISTER™ Industrial Design Team will convert the chosen design into working samples for mock-up rooms as needed, at no charge.

Final quotes provided and approved tooling prepared for manufacturing, based on purchase order receipt.
