# COURSE MAP

# COURSE DESCRIPTION

Located in the visually stunning Marin Headlands The North Face Endurance Challenge Championship course engages runners with both scenic views and drastic elevation change. The new course makes a long ascent out of Sausalito Marin City before making a long loop around Redwood Creek and heading north along Miwok Trail. Runners enjoy ascents through Tennessee Valley, Muir Beach and up to Pantoll Station. A long descent awaits the runners as they enjoy the views of the Pacific Ocean and drop down into Stinson Beach only to re-climb back up famous Dipsea trail. The Dipsea carries runners to the border of Muir Woods National Monument, down through Muir Wood and back to Muir Beach. After a few quick ascents, runners are first treated to dramatic views of the Golden Gate Bridge as they race off the Marin Headlands and then onto the iconic Golden Gate Bridge itself. A short but steep descent off the Golden Gate Bridge is the final push before arriving at the new historic airfield finish of Crissy Field.

## AID STATION ITEMS

# RACE REFUELING BY HAMMER NUTRITION

## DO'S AND DON'TS

- Don't try to "carbo load" the night before
- Don't try to load water or sodium in the days before
- Don't worry about not sleeping much on Friday night
- **DO** get a good night's sleep Thursday night
- **DO** maintain normal hydration and caloric intake in the days prior
- **DO** attend the panel discussion on Thursday night

## NIGHT BEFORE RACE:

**Eat clean, eat until you're satisfied, and then call it a night.** For dinner, consume complex carbohydrates, some high-quality protein, and low-to-no saturated fat. Make sure your meal is low in sodium, and be sure to drink sufficient (but not too much) amounts of water. Skip the alcohol, fatty foods, and dessert... save those "rewards" for after the race.

## RACE MORNING:

- **Finish all calorie consumption 3 hours prior to your race start.** This puts your body in the ideal physiological state to use its stores of on-board fuel efficiently, while also utilizing the vast amount of calories from body fat stores more effectively.
- If you don't plan on being up to eat 3 full hours before race start, sleep in and skip breakfast.

Breakfast should consist of 400-500 calories from low-fiber carbohydrates, protein, and fat. Read all about pre-exercise fueling here: <https://www.hammernutrition.com/pre-exercise>

## DURING THE RACE: **REMEMBER: Less is Best!**

- **Calories** – 120 to 180 per hour
- **Fluids** – 16 to 28 ounces per hour
- **Electrolytes** – 1-3 Endurolytes Extreme per hour (supplies 300 mg of salt per capsule)

*SOURCE: <https://www.hammernutrition.com/less-is-best>*

**CALORIC INTAKE:** The goal of caloric intake is to consume the least amount necessary to maintain energy levels where you want them to be hour after hour. For the majority of athletes, this represents an intake of 120-180 calories per hour. You can always add more!

Calories in Hammer fuels at the aid stations:

- Hammer Gel = 90 calories
- HEED = 5 calories per fluid ounce

*SOURCE: <https://www.hammernutrition.com/caloric-intake>*

**FLUID INTAKE:** Avoid overconsuming! Most athletes can assimilate a maximum of 20-25 ounces per hour. Lighter athletes or cooler temperatures require even less—only 12-16 ounces per hour. Heavier athletes or hot temperatures may require up to 28 ounces per hour.

*SOURCE: <https://www.hammernutrition.com/hydration>*

**ELECTROLYTE INTAKE:** To maintain the optimal performance of many important bodily functions—including muscular performance—regular dosing with a balanced, full-spectrum blend of electrolytes is required.

*SOURCE: <https://www.hammernutrition.com/electrolytes>*

## AFTER THE RACE:

- **"Refill the tank" ASAP with Recoverite.** Consumed within the first 30 minutes after the race, Recoverite is the convenient and effective way to resupply your body with complex carbohydrates, whey protein isolate, and a full spectrum electrolyte profile.

# COURSE MARKING

## RIBBON MARKINGS

- Each distance will follow a unique color of marking that corresponds to the participant's bib color.
- Any time runners do not see their race color among the ribbons hung on the trails, they should take it as an indication that they are no longer on their race course. They should return to the last place they saw ribbon matching their race.
- For portions of the course that will be impacted before sunrise or after sunset, reflective tape and/or glow sticks will be placed alongside course markings.

## FLAG MARKINGS

- As needed, ribbon markings will be replaced by flag markings.

## SIGN MARKINGS

- All Endurance Challenge racers will follow the white directional signage arrows on-course.
- In the event that the course is marked with a colored arrow instead of a white arrow, runners should follow the sign color that corresponds to the color of their race bib.
- Locations where this may occur include when the race distances split and at trail intersections.

## AID STATION SIGNAGE

- At each aid station, runners will find a sign featuring the current mileage and the distance to the next aid station (see bottom image).

## SAMPLE MARKINGS
