OUTDOOR PAVERS

Our 20 mm thick porcelain stoneware Outdoor Pavers by Del Conca USA and Italy, are the right solution for any type of outdoor flooring. They are hard wearing, anti-slip, resistant to weather and heavy loads, without compromises, and with the same aesthetic appeal as the most advanced indoor products.

They were created for quick and easy dry installations, on grass, sand or gravel. They can also be used for raised installations that are perfectly level, and therefore comfortable to use, such as terraces and terraced roofs, allowing rainwater to flow below the floor where it is collected on a waterproof membrane, and leaving a cavity for utilities, that can also improve the thermal insulation of the building.

Moreover, Outdoor Pavers must be installed with adhesive for a floor extremely resistant to heavy loads such as driveways or garage floors.

Outdoor Pavers come in a variety of styles and finishing pieces to match, such as steps and pool copings.

Frost resistant

Colors do not fade over time

Resistant to sudden temperature changes

Antislip

Impervious

Resistant to acid, chemicals, salt, etc.

Highly resistant to heavy loads

Resistant to damage from mold and moss

Installation with adhesive possible

- Extremely Long Lasting
- Wide Range of Finishes
- Special Matching Pieces
- Reusable
- Easy to Remove
- Quick & Easy to Install
- Easy to Clean
- Suitable for Raised Installation
- Allows Water Drainage
- Readily Serviceable

Cleaning & Maintenance

Thanks to its great hardness and weather-resistance, Outdoor Pavers can be cleaned with almost any detergent.

However, we recommend simply using a mild detergent and a water jet. For greater convenience and to avoid formation of limescale deposits, we recommend facilitating drainage with a rubber brush.
