

Donning Instructions -

1. Inspect arming mechanism and cylinder - if **RED**, service mechanism. Don like a jacket, with buckle centered in front, with "**Jerk to Inflate**" handle at lower right.

2. Snap buckle at center front.

3. Adjust side straps to a snug fit.

INFLATED DONNING - Depress oral inflation tube valve located on left side of chamber until the chamber is mostly deflated. Don as described above and reinflate with the oral tube until firm.
