Lenovo

Data and Technology Foundations for AI

Accelerating your AI journey

Two thirds of organizations are struggling to realize ROI from AI investments. Lenovo's Data and Technology Foundations for AI service helps customers rapidly assess and modernize their data, applications, and cloud platforms to accelerate your path to AI readiness. With AI-powered analysis and proven accelerators, we help you lay the right foundations to achieve your AI ambitions faster. Over 67% of companies say legacy systems hinder their AI adoption*, but our pragmatic approach helps you drive more value from your data, cloud and security investments in days, not months. Let Lenovo's expertise prepare you for AI and unlock innovation across your enterprise.

1 Gain rapid strategic insights

Reducing a time-consuming process from multiple months to just days, we rapidly assess your environment and deliver a strategic roadmap and innovation path for your data, cloud, and security technologies.

2 Modernize for AI

Lay the data and technology foundations for your unique needs by leveraging Lenovo's generative AI/AI tools and proven accelerators to modernize your infrastructure and drive more value from existing investments in data, cloud and security.

3 Responsibly Maintain Readiness

Optimize workloads and maintain readiness throughout your AI journey with access to Lenovo experts. We help you cost efficiently and responsibly manage your cloud, data, and security platforms, whether on-prem, in the cloud, or aaS.
