## SAP HANA Services

Helping businesses gain the power to handle bigger data, real-time analytics and solution scalability

Today's business operates in a competitive and ever-changing environment.

To prevail, companies need to employ technologies that enable IT infrastructures to be scalable, faster and resilient. Poor performance and inadequate resource planning lead to disruptions, higher costs and increased effort and time consumption.

Lenovo SAP-certified service consultants assess your SAP HANA or SAP BWA infrastructure to ensure **your IT environment is best adjusted to the business needs**. Benefiting from Lenovo's depth of experience in optimizing system performance, efficiency, and uptime, you can free up your IT resources to focus on value - added tasks that advance business outcomes.

### ✓ Optional **Deployment**

Let Lenovo experts deploy your equipment and keep it running, so, you can focus on the business.

### ✓ Included by default **Health Check**

Consultant-led walkthroughs of your SAP HANA systems' critical elements to enhance your infrastructure control and better serve your business goals
