

Lenovo IoT Intelligent Transformation at the Edge Workshop

**Define your IoT Edge
Strategy. Uncover opportunities.
Get started fast.**

**Smarter
technology
for all**

Lenovo

Why IoT Intelligent Transformation at the Edge?

Real-time data insights have become **critical**. The latency caused as data travels to data centers or to the cloud and then back to the device can be especially problematic. For instance, self-driving cars cannot wait for the roundtrip of data to know when to brake, or how fast to travel.

The growing need for real-time decision making, drives the need for intelligence to the edge and complements less time-sensitive compute in your data center or cloud.

For real-time collection and analysis, the edge is ideal for specific workloads. At the same time, the cloud can provide a centralized location for large scale analytics. Together they provide real-time and longer-term insights.

Developing your strategy around IoT Edge Technology

From autonomous factories, to intelligent retail, to smart offices, and digital cities, business leaders are starting to see real benefits from IoT, but how do you form your strategy around IoT Edge technology?

To define your IoT Edge strategy, evaluate your analytics and AI requirements, and run proofs-of-concept needed to get started fast,

you need the right expertise.

Lenovo AI innovation centers offer an environment to conduct edge POCs, leverage ready-to-use tools, and access our experts in AI and Edge Computing.

Lenovo IoT Intelligent Transformation at the Edge Workshop helps you get the design and implementation expertise you need to build your Edge Computing infrastructure that can support digital transformation and evolve with your business.

What's included

- ✓ Uncover your IoT Edge objectives, requirements and overall business strategy
- ✓ Layout your current environment as baseline
- ✓ Review and discuss pre-collected data and metrics
- ✓ Solution design brainstorm session on right-sized and innovative technology options
- ✓ Identify your pain points and high-value use case opportunities
- ✓ Set the path for leveraging available and emerging technologies to best achieve your business goals
- ✓ Define the process and refine the design for your solution
- ✓ Recap and summary of the design and required effort

Get the trusted expertise you need to achieve your business' growth ambitions.
