MOVE BUSINESS FORWARD WITH MODERN INFRASTRUCTURE

As AI, hybrid cloud, and business-critical workloads reshape how enterprises compete — and expose the limits of legacy infrastructure — the goal is not to refresh, but to transform. Strategic modernization accelerates AI-driven insights, improves performance and cost efficiency, simplifies operations, and enables growth at scale, allowing immediate business value.

Find your best-fit modernization path with Lenovo ThinkSystem SR650 V4 servers and ThinkAgile FX650 V4 Series powered by Intel® Xeon® 6 processors with Intel® AMX built-in AI accelerators.

MODERNIZATION IS NOW A GROWTH PRIORITY

54% of organizations say they need to upgrade outdated IT infrastructure as a top 2026 IT budget driver.[1]

85% of senior executives are concerned outdated technology will limit meaningful AI adoption.[2]

WHERE SHOULD MODERNIZATION START?

Hover or click on each icon to see why it matters, why Lenovo fits, and which platform path is the best fit.

BUSINESS-CRITICAL TRANSFORMATIVE WORKLOADS

Support core business applications with a flexible, performance-ready compute foundation built for enterprise and AI-driven demands.

HYBRID CLOUD FOUNDATION

Build a flexible, agile foundation for workloads that need to move, scale, and perform across environments.

AI-READY INFRASTRUCTURE FOUNDATION

Prepare for practical AI use cases with infrastructure that can support complex data, compute, and operational demands.

VIRTUALIZE TO SIMPLIFY, CONSOLIDATE, AND SCALE FOR AI

Modernize virtualized environments on a standardized platform to reduce complexity, improve efficiency, boost utilization, support growth, and scale with confidence.

PERFORMANCE AND EFFICIENCY WITHOUT COMPROMISE

No matter which Lenovo platform you choose, with infrastructure powered by Intel® Xeon® 6 processors, you can unlock gains such as:

Up to 50%
higher AI performance[3]

2.3x
higher memory bandwidth[3]

Over 2x
AI inference performance vs. competition[3]

Up to 87%
reduction in total cost of ownership[3]

MODERNIZATION STARTS WITH THE RIGHT-SIZED WORKLOAD

Start with what matters most: your workloads, your operating model, and the business outcomes you need to deliver. Lenovo and Intel help you make the right first move — from flexible enterprise compute to validated, simplified infrastructure — so you can modernize faster and with a partner you can trust.

That's the power of Lenovo with Intel Inside®.
