# Seamlessly manage your Infrastructure

Lenovo | AMD

For IT infrastructure, success goes beyond merely measuring 'speeds and feeds'. What truly matters is how systems perform in the real world.

Lenovo ThinkSystem and ThinkAgile systems, powered by AMD EPYC™ processors, make it easier for you to migrate and manage your IT infrastructure. User-friendly centralized tools create a path to better manageability.

Manageability is vital when organizations build out their edge-to-cloud infrastructures

Up to 29% faster system firmware updates and 13% faster system configuration setup using Lenovo V3 servers with XClarity 2.0. [1]

99.999% Lenovo server reliability with AMD processors can reduce risk of unplanned downtime, which can cost upwards of $300K per hour, per server.[2]

Lenovo V3 servers with 4th generation AMD EPYC™ processors offer up to **3:1 server consolidation over older servers**, helping to lower costs.[3]

Embrace Lenovo's unmatched manageability

1. Seamless migration and management

Consolidate your IT footprint by bringing everything together into Lenovo's unified system – Lenovo XClarity. Enjoy the benefits of centralized management tools that simplify overseeing your infrastructure.

2. Smooth & fast deployments

Experience the ease of migrating and managing multiple processor types, streamlining your IT infrastructure for enhanced efficiency, with Lenovo ThinkAgile integrated systems with AMD EPYC processors.

3. TruScale: power & flexibility

Experience the versatility of Lenovo TruScale. This as-a-Service offering provide a streamlined infrastructure with a pay-as-you-go model, providing strategic advantage and flexibility.
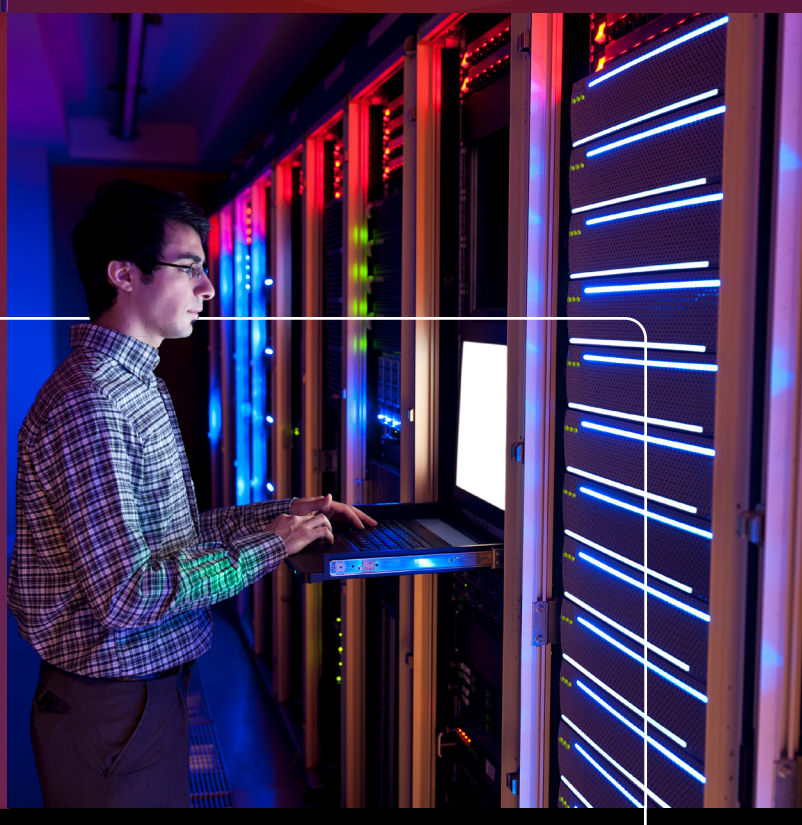

4. Tools for simplified transition

Simplify your transition with migration tools designed for easy movement of Virtual Machines (VMs) to Lenovo servers powered by AMD EPYC processors.

5. Lenovo OneIQ tool

Using the OneIQ evaluation tool, Lenovo helps provide our customers with an end-to-end data center assessment and workload analysis to customize the most cost-effective Lenovo solutions to optimize and modernize IT operations.

Step boldly into a new era of power, performance, and possibilities. The place where modernization isn't just about reducing costs but helping enhance manageability.

Infrastructure modernization – Don't miss out on the countless benefits and heightened performance that lie ahead. The future is here - explore the possibilities and drive your data center to become more dynamic and cost-effective.
