

Confidently navigate the edge-to-cloud frontier with optimized solutions

Lenovo

AMD

Global technology partnership

Engineering prowess

Proven innovation

We deliver outstanding performance and fast insights across enterprises of all sizes, HPC, and Cloud Service Providers. We provide edge-to-cloud optimized solutions using resilient, powerful servers that are designed to mitigate security risks, data threats, and harsh environments.

Explore Lenovo & AMD advantage

What does this mean to you?

Optimized solutions that meet your unique needs

We offer infrastructure designed for your workloads, and can help you identify, plan, design, install and support hybrid cloud, HPC, database, analytics, and AI workloads.

The Lenovo and AMD advantage

Hybrid Cloud

HCI and Virtualization solutions can help you consolidate IT infrastructure and make it easier to manage.

High-Performance Computing

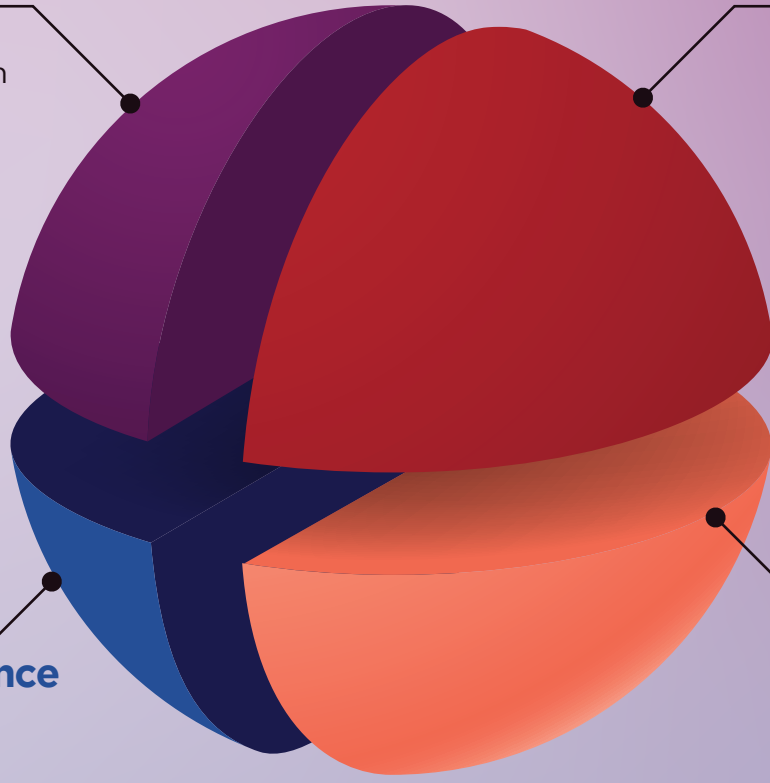

Providing performance-intensive solutions can help HPC customers use data to dramatically accelerate workloads.

Analytics and Database

Our solutions can help you transform data into insights quickly using ThinkAgile Solutions engineered for high-performance workloads.

Big Data Validated Design

A proven architecture for Cloudera Enterprise on ThinkSystem SR655 and SR635 powered by AMD EPYC Processors*, providing excellent price-performance, ideal for Big Data workloads, including batch and real-time analytics.

Discover how Lenovo and AMD are helping accelerate the future for enterprises

Delivering IT services with a difference, backed by a dependable partner.

Blue Sky Systems refreshed its cloud platform with Lenovo ThinkSystem servers powered by AMD EPYC™ Processors, helping the company deliver high-quality client services 24/7.
