

Lenovo TruScale DaaS for Sustainability

The simple way to maximize ROI.

Empower everyone with the right devices while optimizing costs and driving business value with sustainability—all in one flexible, subscription-based service.

Modernize your device fleet without compromising sustainability or adding operational complexity with Lenovo TruScale DaaS for Sustainability.

A smarter approach to device circularity, Lenovo TruScale DaaS for Sustainability reduces waste, controls cost and helps you achieve IT sustainability goals that align with your broader business strategy. Plus, it's all delivered as a flexible, subscription-based model, that will help you create long-term value and scale quality devices.

95%

of IT executives have realized a quarter of the potential cost savings from their sustainability initiatives.¹
