

Lenovo TruScale Device as a Service (DaaS)

Make managing devices simple.

Empower employees with next-gen devices faster and maximize ROI with one flexible subscription-based service for device lifecycle management, security and sustainability. Now that's smarter.

Driving ROI from device fleets is critical today. That means delivering a seamless digital employee experience (DEX)—while managing devices more cost-effectively, securely and sustainably.

Doing this isn't easy. That's why you need a managed device lifecycle service (MDLS) provider like Lenovo.

Smarter
technology
for all

Lenovo

A smarter approach to device delivery.

Lenovo TruScale DaaS is a flexible subscription-based model that helps you put the right devices in the right hands to hit new levels of ROI and productivity.

Do it all with your devices. Modernize fleets faster, simplify IT operations and optimize costs—all with security and sustainability integrated from day one.

The result is simple: you build the most productive DEX and unlock maximum business value from your IT.

Everything you need in one contract:

Total device lifecycle management.

Next-gen devices such as AI PCs.

Leading Digital Workplace Solutions.

Trusted device security.

Impactful sustainability services.

Empower everyone with the best experience.

Hyper-personalize workplaces with Lenovo's AI-driven Care of One™ platform—while optimizing costs with an all-in-one IT partnership.

Empower everyone with the future in mind.

Accelerate AI PC adoption and scale easily with Lenovo's suite of Digital Workplace Solutions.

Empower everyone with trusted security.

Stay ahead of evolving threats with reliable security services from our market-leading security services and partners.

Empower everyone more sustainably.

Offset and track carbon impact easily, simplify end-of-life IT management and reduce costs with Lenovo Certified Refurbished Devices.

Real results across the device lifecycle.

for all

Lenovo

Comprehensive, cost-effective and flexible—Lenovo TruScale DaaS brings better outcomes from start to finish.

Advise

Smarter lifecycle planning. Build a roadmap that suits your needs with industry-leading experts and drive workplace efficiency with AI-driven insights and persona modelling from Lenovo Care of One™.

Implement

Zero-touch deployment. Get up and running fast with automated provisioning and built-in endpoint security and DEX support.

Persona-driven. Match the right device and configuration to every user's needs—creating a personalized DEX from day one.

Support

Hyper-personalized support. Customized, AI-driven and proactive support from Lenovo Service Desk and Lenovo Premier Support Plus resolves issues fast.

Manage

Secure-by-design management. Complete device and endpoint management with built-in patching, app packaging, privilege control and Security Services.

Real-time performance analytics. Keep every device optimized and secure—while integrated DEX tools reduce digital friction.

Retire and Refresh

Everything sorted at end of lease. Data sanitization and hassle-free asset pick-up when assets reach end-of-lease terms.

Cost-efficient decommissioning. Unlock potential value from unused assets, refresh efficiently with Lenovo Certified Refurbished Devices and responsibly decommission IT.
