Take Control of Your Old Hardware

It's something many organizations don't think about until it's too late: what to do with your leftover hardware at the end of its life cycle? If left unattended, asset disposal can easily become a costly and resource-intensive problem. Lenovo's Asset Recovery Service (ARS) helps you mitigate the environmental and data security risks associated with end-of-life asset disposal. **ARS offers a single-source solution for the secure, documented disposition of IT assets and data, and can be customized to address the unique needs of your organization worldwide.**

Lenovo experts will assist you in the development of a sustainable corporate disposition strategy for any technology hardware, with a range of certified asset disposition options to meet your needs.

Stay Compliant

In dealing with client and personal information, you have a great responsibility to ensure data privacy. Maintaining security for social security numbers, financial data, addresses, medical records, and trade secrets is of the highest importance. Compliance with local regulations and industry standard privacy laws such as HIPAA, Sarbanes Oxley, Gramm-Leach-Bliley, and WEEE Directive will not only instill confidence in your clients, but will also help mediate your civil liability and costs.

Once your recovery plan is set, we work with the best vendors in the IT Asset Disposal (ITAD) industry, representing the largest recyclers and refurbishers in the world. They are leaders in corporate and government initiatives to solve the e-waste dilemma, and together with Lenovo, will provide the best solution to address your organization's unique needs. From there, **we'll provide all legal documentation and certificates associated with proper data destruction and environmental processing.**

A Cost-Effective Solution

Asset Recovery Services can help offset some of the costs related to your technology refresh and simplify the transition from old to new with one convenient, single-source solution.

You'll recover value from your decommissioned equipment, lowering the total cost of ownership for your latest IT investment.

Consistency is Key

Our large global coverage network allows your organization to have a single, consistent solution and point of contact across all regions. We're where you need us, when you need us.

And don't worry about who manufactures your equipment—**any and all brands of hardware are covered, including servers, storage, networking, PCs, cell phones, and more.**

Flexible options to meet your needs

Standard ARS Services

- Pickup and secure transport from your location
- Processing to receive, test, and prepare equipment for resale
- Recycling to ensure proper disposal for obsolete equipment
- Department of Defense-certified disk destruction
- Single point of contact and detailed reporting
- Return value for remarketable assets

Additional on-request Services

- Remote or on-site discovery to provide current inventory with value assessment
- Dismantle and move assets to on-site pickup area
- Quarantine hold of assets for specified period to ensure data migration
- On-site data destruction

Other options

- Refurbishment and remarketing
- Recycling of components
- Donation to the organization of your choice
