Lenovo

Lenovo TruScale DaaS for Security

Secure your devices, the flexible way.

Get devices and end-to-end security in one flexible subscription-based contract that optimizes costs, simplifies IT management and helps build total cyber resiliency.

Now that's smarter.

Defend your organization while optimizing costs.

As AI-enhanced attacks are now the number one emerging enterprise risk, endpoint security is a top business priority.¹

End-user devices are often vulnerable to security risks, especially with a dispersed workforce. Securing them against sophisticated and evolving attacks cost-effectively is a constant challenge.

Only 29%

of security leaders believe they're receiving sufficient cybersecurity budgets.²

68%

of organizations face additional risks because of cybersecurity skills shortages.³

Traditionally, device and security procurement have been considered separately. But could a new approach optimize costs and improve resiliency?

In this brochure, we'll demonstrate why the ease of an as-a-Service device security model with a market-leader like Lenovo can benefit your entire business.

A flexible solution for workforce security.

Stay ahead of threats with Lenovo TruScale Device as a Service (DaaS) for Security by combining devices with leading endpoint security and Lenovo Security Services in a flexible subscription-based service. This helps you manage costs while keeping your devices secure, your teams productive and your business resilient.

Everything you need in one contract:

Flexibility of DaaS.

Lenovo ThinkShield defenses.

Trusted device security.

Cost optimization.

Simplify device security with one end-to-end subscription model.

Get complete device security in one flexible contract with a global leader in the DaaS market.⁴

Secure your devices with total built-in protection.

Stay ahead of AI attacks.

Adopt managed services with 24/7 monitoring to stay ahead of sophisticated AI-enabled attacks—combining speed, scale and expertise to tighten security.

Keep your business resilient.

Adopt end-to-end device security, with multi-layered protection spanning hardware, firmware and OS from ThinkShield, to maintain productivity and business continuity.

Secure your devices with scalable solutions.

Optimize security costs.

Leverage our existing relationships with software vendors to update your fleet to next-gen devices and only the security solutions you need—all in one predictable monthly payment.

Scalable security bundling.

Align investments with your current device and security needs through a subscription-based model that allows you to scale up and down as you grow.

Secure your devices with one trusted partner.

Access best-of-breed solutions.

Strengthen your cyber resiliency with best-in-class security software and rapid MDR from Lenovo's ThinkShield IP and leading partner solutions.

Rely on real expertise.

Bolster your security with the support of Lenovo's global security experts without overloading internal IT or Security Teams.

Work with one provider.

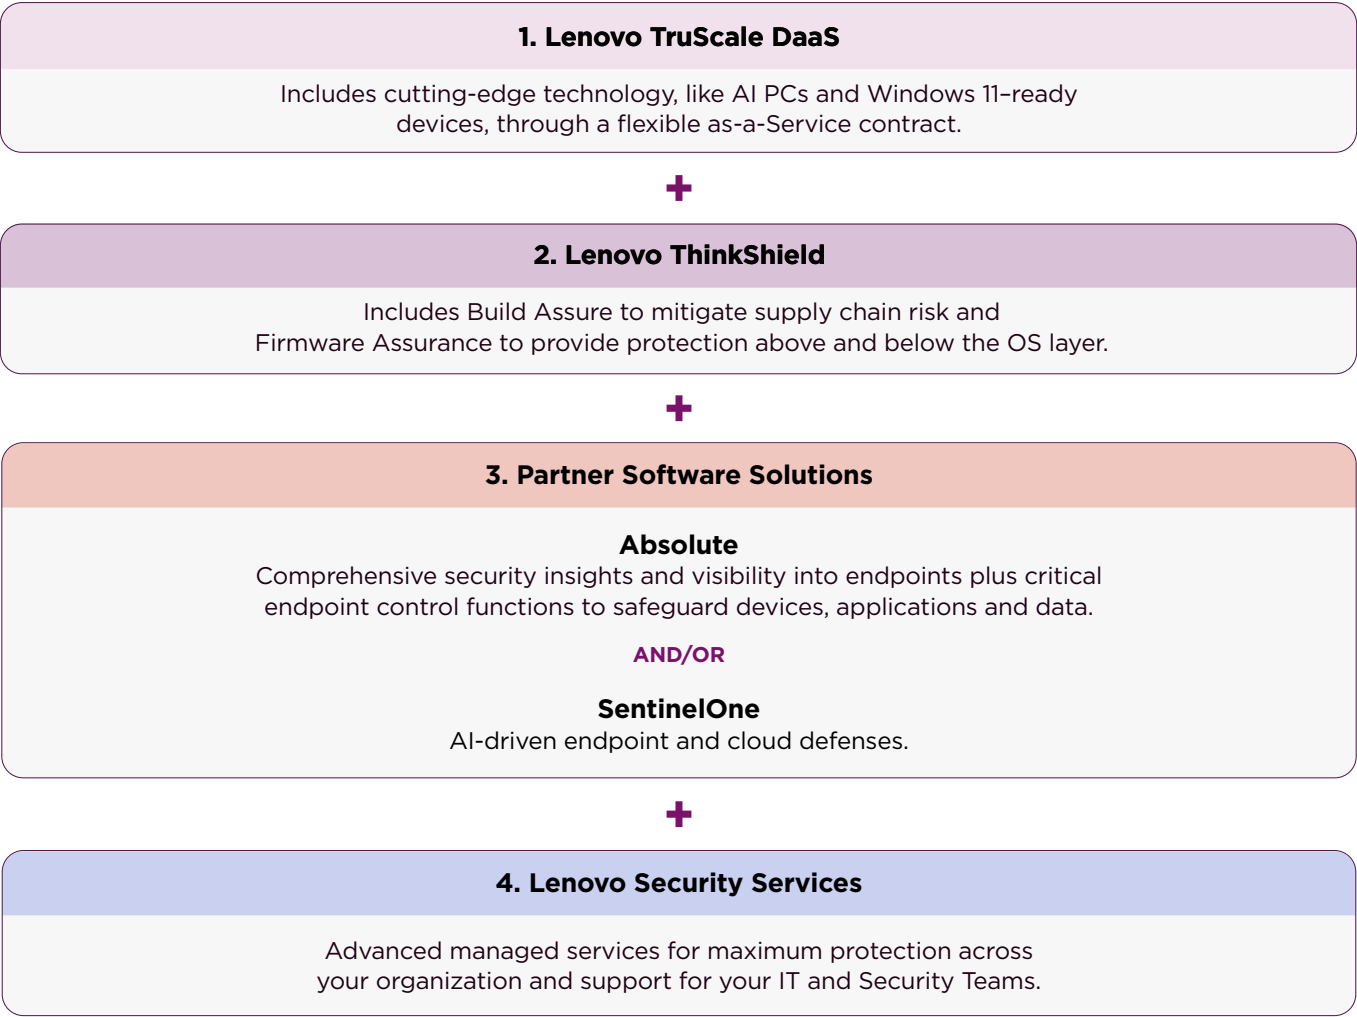

Build confidence in your organization's cyber resiliency through one partnership, reducing vendor sprawl and simplifying management.

Shape security around your needs.

Get devices, endpoint security and Lenovo Security Services in one comprehensive and scalable bundle.

Lenovo TruScale DaaS for Security bundle.

Absolute and/or SentinelOne software solutions and Lenovo Security Services can be tailored as needed.

Results with a combined DaaS and security solution:

57%

decrease in cost per seat in the first year versus purchasing technology outright.⁵

30-50%

reduction in downtime.⁶

10-40%

reduction in IT maintenance costs.⁷

Why Lenovo?

Partner with a trusted market leader to get the right security from your devices—today and tomorrow.

Lenovo TruScale DaaS for Security comes from the world's number one PC manufacturer and global DaaS leader. With Lenovo, you get:

Unmatched rapid response and resilience.

Next-generation AI-enhanced security solutions with capabilities from expert partner ecosystems.

Tailored security bundling.

Optimize security budgets with a tailored bundle using Lenovo's strong partner relationships.

Cutting-edge technology with lower upfront costs.

AI PCs and Windows 11-ready devices keep teams secure and productive.

Easy access to a broad portfolio of digital workplace solutions.

Solutions spanning advisory, collaboration and employee experience to maximize productivity.

#1

The most comprehensive business endpoint security solution in the industry.⁸

Winner

of the 2025 Fortress Cybersecurity Awards for Software & Applications.⁹

Ranked #8

in the Gartner Supply Chain Top 25 for 2025.¹⁰

Trusted partner in
180+ markets.

Step up your security.

Next-gen devices meet end-to-end security and Lenovo Security Services for a workplace without limits.
