Lenovo TruScale DaaS for Security

Secure your devices, the flexible way.

Get devices and end-to-end security in one flexible subscription-based contract that optimizes costs, simplifies IT management and helps build total cyber resiliency.

Now that's smarter.

AI-powered attacks are becoming faster, more targeted and more damaging. Cybersecurity is now a top concern. But how do you build cyber resiliency while optimizing costs and navigating skills gaps? It's time to consider security alongside your devices and take a smarter approach to your organization's cyber defenses.

A flexible solution for workforce security.

Lenovo TruScale Device as a Service (DaaS) for Security is a subscription-based model that combines devices with leading endpoint security and Lenovo Security Services in one flexible contract—to keep your organization resilient and your workforce productive.

Total built-in protection.

Adopt end-to-end device security that gives your IT and Security Teams confidence and allows your employees to work with freedom.

Scalable solutions.

Choose scalable security solutions that suit you today and grow with you in the future.

One trusted partner.

Build confidence in your organization's cyber resiliency with one trusted provider for your entire device fleet.

Everything you need in one contract:

**Flexibility
of DaaS.**

**Lenovo
ThinkShield
defenses.**

**Cost
optimization.**

**Trusted device
security.**

Build resiliency while optimizing costs.

30–50% reduction
in system downtime.¹

57% decrease in cost per seat
in the first year versus purchasing
technology outright.²

Build your own flexible bundle.

Get devices, endpoint security and Lenovo Security Services in one comprehensive and scalable bundle.

Lenovo TruScale DaaS for Security bundle.

Absolute and/or SentinelOne software solutions and Lenovo Security Services can be tailored as needed.

1. Lenovo TruScale DaaS

Includes cutting-edge technology, like AI PCs and Windows 11-ready devices, through a flexible as-a-Service contract.

2. Lenovo ThinkShield

Includes Build Assure to mitigate supply chain risk and Firmware Assurance to provide protection above and below the OS layer.

3. Partner Software Solutions

Absolute*

Comprehensive security insights and visibility into endpoints plus critical endpoint control functions to safeguard devices, applications and data.

AND/OR

SentinelOne

AI-driven endpoint and cloud defenses.

4. Lenovo Security Services

Advanced managed services for maximum protection across your organization and support for your IT and Security Teams.

*These Absolute offerings are only available for Lenovo DaaS customers.

Step up your security.

Next-gen devices meet end-to-end security and Lenovo Security Services for a workplace without limits.
