New from Lenovo: Premier Deploy for Infrastructure

Starting **September 28, 2026**, Lenovo is introducing **Premier Deploy for Infrastructure**, a set of clearly defined deployment approaches within the Infrastructure Deployment Services portfolio for supported ThinkSystem servers, ThinkSystem storage arrays, and ThinkAgile solutions. These approaches help you move from hardware delivery toward production with a clearer path and greater confidence.

	Standard Deploy	Premier Deploy	Premier Deploy Plus
Choose when	You need straightforward physical hardware installation and customer acceptance.	You need operating system installation and/or system configuration, integration and validation.	You need extended post-deployment assurance and visibility after implementation.
You gain	An installed, accepted, and documented hardware foundation.	A validated, integrated environment ready to move into production.	Added assurance as your team transitions into ongoing operations.

What this means for you

Depending on the approach selected, you can:

- **Plan with greater clarity:** Align scope, deliverables, responsibilities, and expected outcomes before implementation begins.
- **Simplify execution:** Coordinate readiness, installation, configuration, integration, validation, and customer acceptance through a defined approach.
- **Extend your team's capabilities:** Add Lenovo-certified expertise for complex environments, cross-technology requirements, or resource-constrained teams.
- **Prepare for ongoing operations:** Move forward with documentation, knowledge transfer, and operational handoff, with added post-deployment assurance and, where included, an infrastructure health assessment through Premier Deploy Plus.

Other deployment needs

If Premier Deploy for Infrastructure is not supported for your platform or is not the right fit for your project, focused technology-specific deployment services and Hardware Installation Services remain available for specialized or installation-only requirements.

For questions, please contact your Lenovo sales representative.

Standard Deploy, Premier Deploy, and Premier Deploy Plus are available for supported ThinkSystem servers, ThinkSystem storage arrays, and ThinkAgile solutions. Specific activities, deliverables, and availability vary by platform, project requirements, geography, and service scope. Refer to the applicable Infrastructure Services Agreement for additional details.
