

Lenovo's Seamless File Migration Service for ThinkSystem DM Series Powered by StorageX

Accelerate Storage Adoption with Lenovo's File Migration Services

Highlights:

Compliant and Smooth Data Migration with proven technology and methods

Confidence:

Work with Lenovo's File Migration Professional Service Team to plan and execute a strategic data migration project. Ensure business continuity and minimize risk.

Outcomes:

Adopt Lenovo's ThinkSystem DM Series and validate your data migration

The Challenge: Seamless & Compliant File Migration

File Migration projects can be a daunting challenge for IT departments. As data continues to accumulate and grow exponentially, enterprises are looking to expand their existing storage capacity or upgrade to a next generation system. Without the right solution in place, moving data can be disruptive, risky, and complex.

"Through 2019, more than 50% of data migration projects will exceed budget and timeline and/or harm the business, due to flawed strategy and execution," according to Gartner's research.

The Solution: Allow our data migration experts to provide you a seamless experience

With Lenovo's professional services, you can eliminate any fear, risk, and disruptions and focus on reaping the full benefits of Lenovo's ThinkSystem DM Series efficiencies and high scale performance. Lenovo File Migration Experts are proficient and use proven technology and methods to execute a successful and secure data migration project.

At the end of the project, we provide you a validation report to ensure your data has been migrated accordingly. In addition, you will have a fully configured, tested, and verified Lenovo ThinkSystem DM Series environment that is up and running.

Opportunity Discovery: Lenovo Principal Consultants identify opportunities for your storage and data journey

With Lenovo Principal Consultants alongside you, you can address any challenges and uncertainties in your business transformation journey. As your trusted advisor, Lenovo leverages workshops, assessments, and our extensive services portfolio to bring clarity to your business needs.

Customer Experience

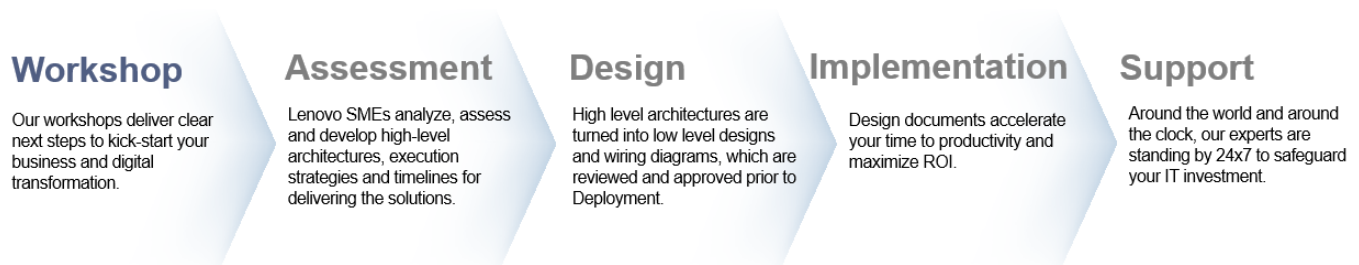

Delivering you value is an integral part of Lenovo's Professional Services team. We firmly believe that we must earn your confidence before executing on the set of deliverables. Hence, we provide all customers a proven methodology for supporting your data migration which includes the following:

- **Pre-Implementation Planning Workshop:**
 - **Discover:** Conduct a discovery session to review your environment, confirm configuration details, and establish a project timeline
 - **Design:** Develop the migration plan with storage mapping and resource requirements
 - **Deploy:** Configure any resources required for the migration
- **Migrate**
 - **Initiate:** Confirm source and destination targets and resolve any issues.
 - **Cutover:** Migrate data according to a set schedule or cutover
 - **Validate:** Verify data movement with a complete validation summary report
- **Modernize**
 - **Optimize:** Update any automation or policies based on requirements
 - **Report:** Documentation that details migration project blueprint and execution
 - **Complete:** Confirm that all aspects of the migration project have been executed. Validate all migrated data from source to destination

Key Benefits:

- Transition smoothly and with confidence by entrusting Lenovo File Migration Experts
- Get your new storage environment up and running quickly and cost effectively
- Maintain business continuity
- Minimize risk and disruption during your migration and enjoy a seamless transition
