

# Lenovo Infrastructure Lifecycle

Lenovo Infrastructure Services delivers to customers the end-to-end Infrastructure lifecycle services from the Data center to the Edge. Our Infrastructure Services start with Discover to understand the business outcomes and Design the best solution for the customer, all the way to Retire: when assets needs to be retired and decommissioned.

All services may not be available in all countries. Contact your Lenovo Representative or Business Partner to learn more about Lenovo's Data Center Support services or visit [www.lenovo.com/DataCenterServices](http://www.lenovo.com/DataCenterServices).
