Lenovo
Hybrid Cloud Services

Cloud computing 2.0. for a cost-efficient, highly available and scalable IT infrastructure

Microsoft   VMware   Lenovo OpenCloud

180%
Hybrid Cloud market growth by 2026 compared to 2019[1]

To enable innovation, speedy execution and be ready to respond to the changing market, businesses of all sizes have adopted or are considering adopting cloud computing solutions.

Lenovo Hybrid Cloud Services gives organizations the flexibility to customize resource allocation while maintaining the necessary control and security, all performed without overwhelming IT.

Leveraging Lenovo expertise to transition to Hybrid Cloud

Over **20** years of joint technical collaboration and innovation between **Microsoft and Lenovo** allows Professional Services team of experts to bolster businesses IT efficiency.
Professional Services to support Lenovo (ThinkAgile SX) for Microsoft Azure Stack:

PLAN   **DEPLOY**   **SUPPORT**   **OPTIMIZE**

PLAN	DEPLOY	SUPPORT	OPTIMIZE
1. Assesment Workshop 2. Solution Design 3. TCO Study 4. POC 5. Technology Lab	1. Readiness Assessment 2. Hardware Installation 3. Deployment Services	1. Managed Services	1. Health Check 2. Data Migration

Today, we can 'cloudify' everything. We can now migrate even the largest applications to the cloud with complete peace of mind.

— *Jacob V. Schmidt, Director of Cloud Factory*

Accelerate business profits with Lenovo **Open Cloud Automation**

Lenovo Open Cloud Automation is the single software dashboard businesses need to plan, deploy and manage infrastructure from cloud to edge. It assures the deployment and lifecycle management of the physical, virtual and cloud-native infrastructure management layers. Lenovo Open Cloud Automation is a pre-integrated solution (Kubernetes, Bootstrap and Red Hat) delivered to your data center.

> ❝ *We wanted to offer customers a private cloud that feels like public cloud. Lenovo Open Cloud Automation is the only product in the market that had the maturity that we were looking for. It has completely transformed the way we work.* ❞
> *-- Thomas Rumpf, **CTO, T-Systems***
