Two -End Fleece Construction: The fleece is knitted with two yarns, face and back yarns only. This construction allows the fleece to be transitional, soft and drapey for value priced garments.

Three - End Fleece Construction: The Fleece is knitted with three yarns; face, middle and back. The middle yarns gives the knit construction stability and durability allowing the back yarn to be thick and uniform brushing for extra softness and pile. This construction allows the fleece to be a durable heavyweight classic that brings back memories of the old favorite school sweatshirt.
