

dwarf hamster

care sheet

Dwarf hamsters, including Djungarian, Chinese, Russian and Roborovski hamsters, have a high level of energy. They are clean and captivating companion animals.

facts

average adult size:	2 to 4 inches long depending on species
average life span:	up to 2 to 3 years with proper care
diet:	herbivore

Note: The information on this Care Sheet is not a substitute for veterinary care. If you need additional information, refer to the Sources section or contact your veterinarian as appropriate.

Developed with and approved by a qualified veterinarian.

diet

A well-balanced dwarf hamster diet consists of:

- High-quality hamster lab blocks and limited amounts of grains, vegetables, fruits and Timothy hay.
- Clean, fresh, filtered, chlorine-free water, changed daily.
- Do **not** feed chocolate, caffeine or alcohol as these can cause serious medical conditions. Avoid sugar and high-fat treats.

feeding

Things to remember when feeding your dwarf hamster:

- Fresh food and water should always be available.
- Limited amounts of grains, vegetables, fruits or Timothy hay can be given daily but should not exceed 10% of their total diet.
- Vegetables and fruits not eaten within 24 hours should be discarded.

housing

- Hamsters acclimate well to average household temperatures, not to exceed 80°F; be cautious of extreme temperature changes. The habitat should never be in direct sunlight or in a drafty area.
- Habitat should be plastic, metal or glass and escape-proof with a solid bottom; there should be plenty of room for the hamster to exercise and play. It is best to provide the largest habitat possible.
- 1 to 2" of bedding should be placed in the habitat; proper bedding includes high-quality paper bedding, crumbled paper bedding or hardwood shavings. Cedar-based products are not recommended.
- Hamsters are solitary animals, but dwarf hamsters may be kept in same-sex pairs if they are raised together; otherwise, keep adult hamsters housed separately. Different types of small animals should **not** be housed together.

normal behavior and characteristics

- Play during the night and rest during the day (nocturnal) but can adjust to your schedule.
- Easy to handle but move quickly; some species, such as Chinese dwarfs and Robos, are less likely to nip or bite.
- Chew on objects to maintain incisor teeth, which grow continuously; ensure they have plenty of wood chew sticks or mineral chews.

habitat maintenance

- Clean and disinfect the habitat and its contents at least once a week with a 3% bleach solution. Rinse and allow to dry completely before placing the hamster back into the habitat.
- Remove wet spots daily; change bedding at least once a week, or more often as necessary.

grooming and hygiene

- Hamsters stay clean and rarely need baths, but can be spot-cleaned with a damp washcloth or unscented baby wipes if needed. Hamsters enjoy a weekly dust bath.
- Consult with a veterinarian if a hamster's teeth seem too long.

signs of a healthy animal

- Active, alert and sociable
- Eats and drinks regularly
- Healthy fur and clear eyes
- Breathing is unlabored
- Walks normally
- It is normal for a hamster's teeth to be yellow; cleaning is not necessary.

red flags

- Weight loss
- Abnormal hair loss
- Diarrhea or dirty bottom
- Distressed breathing
- Lethargic
- Eye or nasal discharge
- Skin lesions
- Overgrown teeth

common health issues

Health Issue	Symptoms or Causes	Suggested Action
Diabetes	Frequent urination and lethargy.	Consult with a veterinarian.
Diarrhea	Loose stool caused by poor diet, stress, internal parasites, unclean housing or other illness.	Consult with a veterinarian to determine cause and treatment.
Malocclusion	Overgrown teeth.	Consult with a veterinarian to have teeth trimmed regularly.
Mites	External parasites that cause hamsters to lose patches of hair.	Consult a veterinarian for treatment.

If you notice any of these signs, contact your veterinarian.

shopping list for needed supplies

- Appropriately sized habitat
- High-quality hamster food
- Treats
- Bedding
- Nesting fluff
- Food bowl/water bottle
- Exercise wheel
- Hideaway place
- Toys
- Wood chews
- Mineral chews
- Dust and dust bath
- Book about dwarf hamsters

Ask a store partner about Petco's selection of books on dwarf hamsters and the variety of private brand products available for the care and happiness of your new pet. All private brand products carry a 100% money-back guarantee.

Because all small animals are potential carriers of infectious diseases, such as Lymphocytic Choriomeningitis, Rat Bite Fever and *Salmonella*, always wash your hands before and after handling your small animal or habitat contents to help prevent the potential spread of disease.

Pregnant women, children under the age of 5, senior citizens and people with weakened immune systems should contact their physician before purchasing or caring for small animals and should consider not having a small animal as a pet.

Go to cdc.gov/healthypets and petco.com/caresheet for more information about small animals and disease.

This Care Sheet can cover the care needs of other species. Go to petco.com for more information.
