CalGreen Compliant

All items with this logo meet or exceed the flow rate criteria of the California Green Building Code.

Meets EPA WaterSenseSM Standards

All items with the WaterSenseSM logo meet or exceed the certification criteria of the EPA's WaterSense Program.

ADA Compliant

Models displaying the International Symbol of Accessibility are accessible by physically disadvantaged persons and meet all ADA/ANSI A117.1 requirements.

UltraSealTM

All metal 1/4 turn cartridge for superior durability and handle feel.

SecurePfitTM

All items with this logo include a unique fixed -hub handle which threads directly to the valve cartridge for significant structural rigidity.

WaterSenseSM

We went green more than a decade ago. Our initiative with products that were certified by the Environmental Protection Agency's WaterSense program started in 2007, long before others heeded the call. Faucets engineered to reduce water consumption by 30% or more – without sacrificing performance – were crucial to us as good citizens. We'll continue to create innovations that support conscientious households, and the future of our planet.

CEC Compliant

Less usage never felt so good. With Pfister faucets, being water-wise requires no sacrifice. In fact, meeting the California Energy Commission's standards is likely unnoticeable on a daily basis. What you do know is that your showerhead meets the strict WaterSense performance guidelines and that you're using significantly less water without any extra effort. Hooray for innovation that's effective and enjoyable!

CalGreen Compliant

We got this. Many Pfister products already meet or exceed the California Green Building Code. Which means that we've committed to reduce the overall use of potable water within any given building by at least 20%. This stringent measurement meets Cal Green criteria, but we're always improving to exceed current standards. Future generations can count on us.

Stellen™

The Stellen kitchen collection combines sleek, simple lines and contemporary curves to create a modern faucet designed to meet today's demand for popular urban and Euro designs.

React™

Touchless Technology

Pfister faucets with React™ Technology put you in charge. Speed through food prep, dish washing and clean-up. Reliable, touchless operation keeps the spread of germs in check and reduces fingerprints and water spots.

REACT™ Sensor

Simply guide your hand within 3" in front of the sensor range to turn the water on or off.

High-Temperature Limit Stop

Temp Adjust gives you the freedom to dial in your ideal water temperature in sensor mode. Set it once and forget it or adjust it as often as you like.

Open Valve System

By tilting the handle to the outward position, it gives you a clear visual indicator when the electronic mode is engaged.

Manual Override

The sensor can be overridden by turning the dial on the control box counter-clockwise. The faucet can then be used manually.

Three-Function Spray Head

Toggle between spray, stream, and pause modes right in the palm of your hand for efficient rinsing, cleaning, and filling functionality.

Deckard™

The Deckard Collection embodies soft-modern design by incorporating curves into the familiar sleek, hard-edge motif of modern aesthetics. The clean, horizontal lines in this design create a precise look as the contrasting subtle curves offer balance. The small footprint of this faucet and the thin profile of the spout and handle make this a clean design that is optimal for any modern space.

Arterra™

The Arterra Collection displays its classic lines without being too ornate. This allows the family to fit both a traditional styled interior and/or contemporary one. The faceted surfaces allow for a bold look that's not overpowering. This family was designed to slightly modernize the look of a more traditional bathroom while adding a classic twist to a more contemporary one.
