**WeatherGuard™** protection greatly enhances the performance of standard zinc products, formulated to withstand the harshest weather conditions and stand up to the corrosive effects of pressure treated lumber. Extensive testing and field use have proven WeatherGuard is far superior in corrosion resistance over competitive standard zinc-plated products.

When subjected to 312 hours of salt fog spray testing (BHMA A156.18), standard zinc hardware showed severe corrosion while hardware protected by WeatherGuard withstood these harsh conditions with very little deterioration.

---

**WeatherGuard™ Benefits**

- Superior rust protection
- Extends the life of outdoor hardware
- Safe to use with pressure treated/ACQ lumber

---

**After 312 Hours of Salt Spray Testing**
