The ombré trend, in which one color gradates into another lighter shade, has made its way onto tiles and into homes. The Degrade series consists of 8” × 24” ceramic tiles that gradate and vary in tone from light to dark, creating a very unique look. The grooved and textured surfaces add even more originality to walls as they reflect light and enhance the tile’s color. Solid-colored Maiolica is the perfect complement to coordinate with all the shades of Degrade.

Breathe new life into floors and walls with stunning patterned and colorful tiles. From bright and bold colors that make a statement to soft and subtle patterns that blend in, explore how these exciting series can enliven your space. Choose from cement tiles made in the traditional manner or get the same old-world style with modern materials.
HELMSLEY

This arabesque encaustic tile was inspired by a chain link design. With the addition of the black-and-white X pattern behind it, this tile presents an interesting juxtaposition of hard and soft lines in a neutral-yet-bold color palette. Use the Helmsley tile on its own for a monochromatic pattern or with other arabesque encaustics to mix and match, and create a design all your own.

ARABESQUE 8 IN. MATTE

SWASHBUCKLER

If this tile reminds you of a statement-making belt buckle, you’re not imagining things. The design of Swashbuckler was inspired by the shape of a belt, loop and buckle. This idea was then transformed into an abstract design consisting of concentric ovals in tonal grays and a central diamond design. Make a statement on your walls or floors with this unique encaustic tile.
MADEMOISELLE AND MONSIEUR

Madeleine and Monsieur encaustic tiles bring the chic French style of bold patterns and soft lines to your home’s walls and floors. Color schemes consisting of off-white, black and white accentuate the unique arabesque shapes, ensuring that these tiles stand out wherever they’re used. The perfect complements to one another, pair Madeleine and Monsieur together for a bold checkerboard effect.

NARA

Inspired by the look of a knight’s shield, create a medieval crest pattern that enlivens your floors and walls with the Nara encaustic tile. The bold geometric design in black, grey and white is complemented by the soft, feminine arabesque shape. Use Nara to create a boldly patterned design, or pair it with other encaustic arabesques to develop your own individual design.

BLU WIDOW

Inspired by the intricate natural beauty of a spiderweb, the 8” Blu Widow Hex tile transforms into a work of abstract art when it’s installed on your walls or floors. Cobalt and sky blues naturally create a calming effect, perfect for spa-inspired bathrooms. The geometric design of this encaustic tile comes alive as a diamond motif, lending modern appeal to entryways, kitchens, bathrooms and more.

ROGUE HEX

The apparent simplicity of the Rogue Hex encaustic tile is deceptive. Inspired by tessellations, or repeated, close-fitting polygons, the diamonds and triangles on this hexagon tile can be flipped in different directions to create cubes and other geometric designs. Design a chic black and white accent wall or entryway floor with timeless style using 8” Rogue encaustics.

Even the solid colors of these wall and floor tiles will have natural variation and interest because they are hand mixed before being poured.

MATERIKA

The dabbled tones of these 12” × 25” porcelain wall and floor tiles evoke a true industrial cement floor. This neutral tile series is right at home on kitchen, entryway, living room, bathroom and laundry room floors and walls. Materika can be paired with any number of other tiles or decorative styles—it’s matte colors add interest while remaining timeless in your home for years to come.

DECOR FLOW

It’s easy to achieve the authentic appearance of cement with this 12” × 25” porcelain wall and floor tile. Available in dark grey, sand, grey and white, Decor Flow is the perfect decorative pairing with the Materika collection in entryways, kitchens, bathrooms or laundry rooms. This tile is double fired to produce a unique texture and sheen on the surface, and the cross-hatch pattern creates a nice foil on the simple cement look.

DECOR CONSTELLATION

Decor Constellation offers a unique mix of cement-look texture and dotted pattern on its surface, courtesy of a double-firing process. This process also lends different finishes to the tiles, creating the illusion of texture and shine. A versatile series in its own right, you can pair the 10” × 30” Decor Constellation series with the Materika series or all on its own to get a cool, industrial look.

DESIGN TIP

Design a soft contemporary space using neutral tile with a concrete look. A mosaic with stainless steel flawlessly accents the metallic quality in the tile.
CHALK
In a soft, textured finish, the Chalk series presents a textured appearance that almost resembles the surface of concrete. The square and diamond-shaped porcelain tiles are neutral in color yet rich in texture. Use the diamond shape to create a cube effect on walls and floors together with the rest of the neutral colors in the Chalk series, or use either shape on its own for all-over texture.

DOWNTOWN
The movement on this porcelain tile series imitates the idea of a knife flowing on an unfinished plaster wall. The large-format 32" x 32" Downtown series can be used as a wall or floor tile. Create a natural, serene feeling in your home with Downtown’s matte finish. Decorate your home with the monochromatic hues on their own or combined to create a pattern.

“Hygge” is a Danish word that means a sense of coziness and comfort. The delightful Californian Wood series embodies the hygge trend through a light-colored wood and birch style largely influenced by Scandinavian countries. The two sizes of Californian Wood create a sense of minimalistic warmth with their soft tones. Suitable for wet areas, this wood-look series is great for a steam shower, accent wall or a super-sleek floor option.

Adorn a fireplace, backsplash or accent wall with the rustic wood look of Colonial Wood. This 3” × 12” ceramic subway tile has everything to love about the look of weathered wood—color variations, wood grain and imperfect markings, all in an updated glossy finish. A variety of grey, green, blue, brown and white tones contribute to making this tile a versatile one that fits in well with many styles of decor and other tiles.

ARCTIC WHITE

Sourced from only one quarry in the world, this Turkish marble is an extremely rare stone that is only available at The Tile Shop. For anyone who wants a unique stone look, it doesn’t get much more exclusive than Arctic White. This marble is actually ivory in tone, providing a warmer, softer look for those that want to stay away from stark white marble. A brushed finish lends this collection an even softer, more modern and welcoming appearance. Bring out the warm tones of Arctic White by pairing it with other warm-toned tiles, such as wood look, natural pebbles and textured mosaics.

DOT AC

Large format and texture come together in the Dot AC ceramic wall tile series. A unique three-fire technique that isn’t found anywhere else in the world is used to create the surface texture and sparkly appearance of these 18” × 35” tiles from Brazil. Dot Dark, Inox, Light and Rose Gold go through three separate firings that establish the body, the base color and the textured dots of the tiles, respectively. The hint of shine comes from a reactive glaze applied to the surface.

MOS METALICA

Mos Metalica is inspired by natural cloth material to bring a handcrafted and traditional vibe into a floor or wall space. The porcelain large-format 24” × 24” tiles create an artisanal look, drawing from a color palette of metallic blues and brown accents.
Metalica has to be touched and seen to be believed. A 3-D textured illusion is created with geometric and organic patterns made from high-gloss metallic materials. This technique replicates an artisan embroidery of metal wires. The large-format 18” × 35” ceramic wall tiles are available in either silver, gold or light gold and in four original designs.

**EFFECT**

The latest advances in tile technology are to thank for the stand-out designs that take the ceramic Effect series to another dimension. A third firing and digitally printed glaze create the delicate lace-inspired and contemporary linear designs on the faces of the tiles that can be installed in a random pattern to create a patchwork look. Play with contrasting colors for bold effect or create the element of surprise with a monochromatic, textured installation.

**PATCH ART**

When you’re seeking a stand-out design, opt for a tile that plays with texture and finish to add another dimension. Patch Art 7” × 7” ceramic wall tiles have matte backdrops topped with glazed patterns on the surface created by an unusual additional firing in the tiles’ creation process. The random glossy patterns are set off by the contrasting finish of the background, adding up to one-of-a-kind works of art.

**DESIGN TIP**

Mimic the effect of wallpaper from floor to ceiling with easy-care (and stunning!) 3-D multifired tile.
### PIXEL AC

Based on the designs of tufted upholstery and woven fabric, Pixel brings a detailed intricacy to tile. Metallic designs pop in relief against matte backgrounds, juxtaposing finish and texture. Play with the different faces of this series to bring an authentic artistic quality to your space.

### TEAR

If the Tear series brings to mind the woven patterns of fabric, you have guessed the motivation behind the designs on these tiles. Tear (pronounced tay-ar) is the Portuguese word for “loom.” Channel artisan, handmade yarn crafts using a ceramic tile with a metallic twist that elevates the entire look on the walls and floors of your home. These 7” × 7” tiles present a handmade-look surface of metallic gold or silver lines in relief on a black or white background.

STENCIL

The Stencil series represents disordered designs with a wide variety of textures. The design is inspired by the Asian art of stencil painting. The 11” × 11” ceramic tiles go through a multifiring process to give them their 3-D finish. Install the different faces of Stencil Light and Dark in a random pattern to create a patchwork effect. The multifiring process on the tiles creates a strong textural and visual contrast between the deep, rich black and pure, light white.

CHAIR RAILS/FRAMING
Chair rails and frames finish a tile installation with added interest and detail, making it feel complete and designer. Uses include accent chair rails, a wainscoting effect, countertop edges, crown molding, framing a feature wall and being used instead of a bullnose tile.

As an accent, a chair rail edge, a border or a frame, nothing dresses up a design like an elegant trim piece. These defined pieces can even be used in place of a bullnose tile.

Layering trim and profile pieces can make every tile design better by adding dimension and interest; it shows that the design has been thoughtfully curated and has the finishing touches that elevate the space from basic to beautiful.

TILE PURCHASING AGREEMENT

The product you are purchasing is either a natural stone product quarried and cut from stone quarries, clay tile or other product processed and manufactured to achieve certain effects of color and texture.

You understand and agree that stone is a natural product subject to variations in size, color, shade, veining, texture and polish. These variations are what make natural stone unique.

All stone samples are provided by the manufacturer and are intended to convey the characteristics of a certain type of stone, but variations will occur.

You understand that the product’s conformity to a sample is not assured and is not the basis of the Sales Agreement.

Although manufactured and processed tiles may be more uniform, they can also have variations in color and texture. In addition, the color of any sample may display differently when large amounts of the color are visible.

Where sales taxes are applicable, all orders are subject to the taxes in the location where the customer picks up/receives the order.

TILE SPECIFICATION SHEETS

Technical data for porcelain and ceramic tiles is available to view and download on our website. If the product you wish to obtain a tile specification sheet for is not listed, we do not currently have it available.

An informational glossary is available as a reference for the technical data listed on our tile specifications sheets that further explains the different tests and standards that are provided for our porcelain and ceramic tiles.

Natural stone is not manufactured; it is a product of nature. For this reason, it is not tested the same as porcelain and ceramic tiles. Test results will not be available for natural stone products such as travertine, limestone, marble, onyx or slate.

For specific questions about natural stone, please reference our Information and resources web pages, or contact a Tile Shop customer service representative for additional information.

RETURN POLICY

If you are dissatisfied with the product for any reason, you must promptly notify the product sales representative of The Tile Shop in order to receive a full credit of the purchase price and the return of the product.

A refund with no restocking fees will be issued for full boxes of current tile returned in good box condition within 90 days of the date product was received.

Sealed liquid products and setting materials may be returned within 90 days of the date the product was received.

No returns allowed on discontinued or special order items.

Once the product is installed it may not be returned under any circumstances. It is important that you understand that once the product is installed you are accepting the product without recourse.

You may return online purchases to your local Tile Shop showroom or contact a customer service representative for return shipping instructions.

Delivery/freight is nonrefundable.
