Steps to Using Platinum Mortar

- ① Use approx. 5 - 6 qts. of clean water per 50 lb. of powder.
- ② Pour powder into the bucket of water until the water forms a ring around the powder.
- ③ Use a spiral mixer to mix the thinset to a "cake batter" consistency. Let it slake for 5 minutes, then mix again.
- ④ Use product within pot life. Do not re-temper*. If thinset is no longer workable, discard the thinset and mix a new batch.

*Add additional water and re-mix after initially activating product.

[Always add powder into liquid when mixing]
