

PRO-PRIMER

Pro-Primer contains an acrylic latex adhesive that seals absorptive substrates such as exterior grade plywood, cement board, or slab cement and improves adhesion with the self-levelling underlayment.

Key Features

- For use with self-leveling underlayments
- Seals absorptive substrates to ensure proper curing
- Maximum stain resistance

Installation

Packaging: 1 gallon

Mixing Ratio: Use full strength

Coverage: 400 sq. ft. per coating depending on porosity

Related Products

- Thinsets
- Pro-Level

Primer Tips

- Shake well before using
- Clean all tools with soap and water
- Always test products in an inconspicuous area prior to general use
- Use and store primer between 40° and 90° F

Steps to Apply Cleaner

- ① Apply Pro-Primer with a stiff broom, roll or brush evenly over substrate. Do not allow product to puddle.
- ② Allow to dry to a clear film; approximately 1 - 3 hours depending on conditions.
- ③ It is recommended to apply 2 coats, however using Pro-Primer over highly porous substrates like concrete, a second coat is necessary.
