SURFACE REDUCER

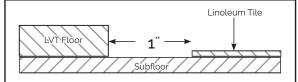

Surface reducers are used to fill the gap between floors of unequal heights.

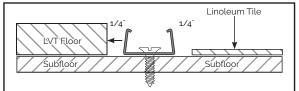

Installation

1.

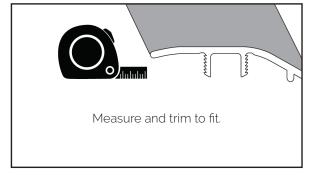

Install the flooring leaving a 1" gap between the two floors for the surface reducer installation.

3.

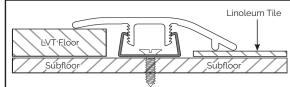

Center the track between the flooring leaving a 1/4" spacing between the track and floor planks. Screw track to subfloor (or glue down with construction adhesive). * May need to use supplied shim

2.

4.

Starting at one end, press the molding into the track inching along the length of the molding.

You may also use a rubber mallet.
