

Purpose: To remove stains that has penetrated into porous tile or stone surfaces

METHOD A

Product Recommendations: Natural Stone Deep Clean

Equipment: Scrub brush or Black nylon pad, Rubber Gloves and white cotton towels

Coverage: Varies; test first to determine amount of product needed depending on number of stains present

Procedure:

1. **Always test a small area first to ensure satisfactory results.**
2. Sweep or vacuum surface.
3. Apply a liberal amount of undiluted **Stone Deep Clean** over stain(s).
4. Allow to stand up to 2 hours, not allowing **Stone Deep Clean** to dry on surface.
5. If necessary, apply additional remover or sprinkle with hot water and agitate with a scrub brush or Black nylon pad.
6. Wipe up residue with absorbent white cotton towels.
7. Rinse thoroughly with water.
8. Wipe surface dry with clean, absorbent, white cotton towels.
9. Repeat procedures if necessary.

METHOD B

Product Recommendation: Stone Poulitice

Equipment: Bowl, household plastic wrap, plastic putty knife and sponge

Coverage: Varies; test first to determine amount of product needed depending on number of stains present

Procedure:

1. Sweep or vacuum surface.
2. Mix several tablespoons of **Stone Poulitice powder** with water in a bowl to form a thick, pliable paste. If desired results not achieved, use **Stone Deep Clean** in place of water.
3. Apply a 1/4" (.64 cm) thick layer of paste directly over stain with at least a 1" (2.54 cm) overlap beyond edge of stain.
4. Cover with household plastic wrap, taping around perimeter to seal over **Stone Poulitice** mix.
5. Allow paste to stand on stain for 24 to 48 hours.
6. Remove **Stone Poulitice** without scratching surface with a plastic putty knife and wash off residue with clean water and sponge.
7. Repeat procedures if necessary. If area darkens from absorbed moisture, it should dry completely within 2 to 4 days.
