

GROUT HAZE & FILM REMOVER

Grout Haze & Film Remover is a citric acid cleaner designed to assist in the removal of grout haze from the surface of tile after grouting. Haze Remover is ideal for ceramic, porcelain, glass tiles and unpolished natural stone.

Key Features

- Eliminates haze caused by grouting
- Effective on glazed and unglazed surfaces

Installation

Packaging: 32 oz.

Mixing Ratio: Dilute 3oz. per gallon of water

Coverage: A quart will cover 75 - 200 sq. ft.

Related Products

- Scrubbing Sponge
- Tile & Grout Maintenance Kit

Cleaner Tips

- This product should not be used on polished natural stone
- Avoid using cleaners containing ammonia or bleach as harmful fumes result
- Always test products in an inconspicuous area prior to general use
- Use and store cleaner between 40° and 90° F

Steps to Apply Cleaner

- ① Dilute a minimum of 3oz. of Grout Haze & Film Remover into a gallon of water
- ② Wipe off with clean water only to remove any residual cleaning solution from surface.
- ③ Within 10 days of grouting, use full-strength mixture IF grout haze was not removed during clean up. Apply directly to the surface and agitate with a scrubbing sponge.
- ④ Allow the product to dwell on the surface for 5 - 10 minutes for stubborn areas
- ⑤ Rinse with clean water and buff the surface dry.
