Medium: Mix 1 part cleaner to 7 parts water
Heavy: Mix 1 part cleaner to 4 parts water

Coverage: A quart will cover 75 - 250 sq. ft.

Related Products

- Scrubbing Sponge
- Grout Brush

Application Tips

- Always test products in an inconspicuous area prior to general use
- Avoid contact with skin; recommended to wear gloves and eye protection
- Acids of all kinds can etch, lighten, or change the color of cementitious and stone surfaces
- Do not use with cleaners containing ammonia or bleach as harmful fumes will result
- Use and store cleaner between 40° and 90° F

Steps to Apply Cleaner

- ① Clean area and moisten with water before applying cleaner.
- ② Apply product to surface with Scrubbing Sponge and agitate with a grout brush; allow to dwell for 4 - 5 minutes.
- ③ After 5 minutes, re-agitate with the grout brush.
- ④ Rinse the dirty solution with clean water at least 2x.
- ⑤ Continue to agitate before allowing foot traffic on the surface.
