14" x 14" x 3.5"

Related Products

- Glass Shelf 13.5" x 3.5"
- Thinset

Installation Tips

- Wear suitable protective clothing, eye goggles, gloves and dust mask as needed
- All surfaces must be structurally sound and free of contaminants before
- Refrain from using if rain or moisture is expected within 24 hours of application
- Store flat and in a dry location; protect from direct sunlight

Steps to Install Recessed Shelf

- ① Decide where you want to place your recess niche. Be sure to consider how much water it will be exposed to when deciding when to install. If installing a glass shelf, be sure to consider the height of your bottles to determine height of shelf.
- ② Install 2" x 4" sleeper studs to support the recessed and cement board on all sides. Make sure the area is clean and free of debris.
- ③ With the recess level, begin by screwing in one side. Use level before screwing in the second side.
- ④ Cut backer board to fit around the recess. Fiber tape may be used on all 4 joints around niche and skimmed over with thinset; or fill the joint with clear silicone for waterproofing.
- ⑤ Tile may be installed directly on the back of the niche using a modified thinset.
