opentext™ | RightFax™

OPENTEXT RIGHTFAX

Help improve productivity and efficiency, reduce costs, and optimize business processes

Business systems (ERP, ECM, EMR) produce and consume content that needs to be securely delivered to specific recipients while maintaining regulatory compliance. Successful organizations understand this and are adopting robust information flows to optimize their processes and increase the speed and security of their business. However, without the right tools, process optimization can potentially fail to deliver optimum results.

Fax is a principal component of content-centric workflows. OpenText™ RightFax™ offers a powerful, enterprise-grade digital fax solution that integrates with the enterprise applications that drive business processes to help maximize productivity, reduce risk, and decrease costs.

For more than 30 years, RightFax has been one of the most flexible and configurable fax server available, with advanced security, outstanding reliability, and integration and automation capabilities that make it a trusted choice for enterprises worldwide.

Support digital transformation and modernization initiatives

RightFax helps transform fax-dependent workflows, especially those related to interactions with customers and other stakeholders, to help eliminate inefficiencies, drive competitive differentiation, and improve bottom-line results.

Reduce cost

By digitizing manual, paper-based information exchange, organizations can help reduce errors and the costs to resolve them and enable digital, paperless faxing to maximize productivity.

Increase user and workflow productivity

RightFax integrates with email and desktop applications for fast and easy electronic faxing in users' familiar environments.

Ensure compliance

With RightFax, organizations can comply with customer, industry, and data privacy mandates and help improve security and auditability of messaging and information access.

Decrease time to revenue and increase customer satisfaction

Consistent, reliable, and secure fax communications increases the speed of transactions to help improve customer satisfaction. Organizations can integrate with enterprise applications and automate paper-based, manual fax processes to shorten business cycles.

Helps to eliminate inefficiencies, drive competitive differentiation, and help improve the bottom line

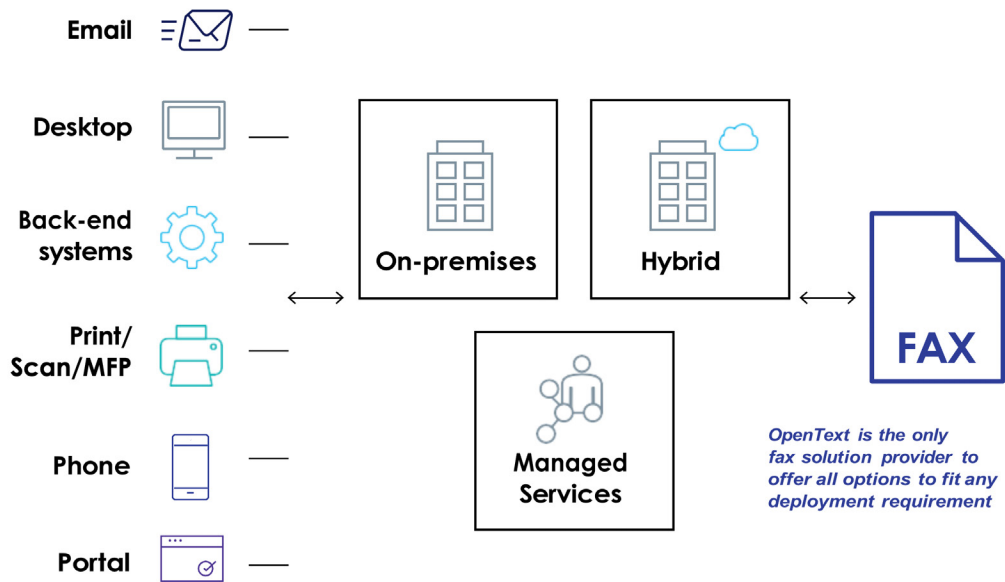

Supports the reduction of costs and the increase of productivity by digitizing manual, paper-based information exchange

Supports an increase in productivity by integrating with email and desktop applications

Helps to ensure compliance with customer, industry, and data privacy mandates

For more than three decades, RightFax has been a trusted leader in enterprise fax and secure messaging and offers a fax server with comprehensive deployment options to help meet today’s needs and evolve as needs change. Available fully on-premises, as a hybrid fax deployment, or as a managed service, RightFax redefines and modernizes secure fax to help reduce risk, improve integrations to back-end systems, and increase efficiency.

DEPLOY IN MULTIPLE WAYS

RightFax integrates with email, desktop, and back-end systems to help simplify the secure exchange of faxed documents. Users can also use mobile devices and web-based portals for anytime, anywhere access to faxing.

OpenText RightFax features	
Back-office integrations	Includes deep integrations with ERP, EIM, EMR, CRM, and legacy systems, including SAP, Oracle, and Microsoft® SharePoint®
Send and receive from any email system	Provides pre-built connectors to Microsoft Exchange and IBM® Notes and integrates with any email application
