

TUNGSTEN AUTOSTORE™
Product Summary

TUNGSTEN AUTOSTORE

Automate inbound information
with intelligent document
capture workflows

CAPTURE, AUTOMATE, DISTRIBUTE

AutoStore is an integrated solution that enables automated document capture workflows from a wide range of hardware and software platforms. It is built for the office, providing capabilities designed to help workers be more efficient and productive in the way they work, while providing enterprise-level controls for information security and governance. By working across the most comprehensive range of MFP brands and models, business systems, and mobile devices, AutoStore offers a central way to manage all document and data capture activities across any enterprise IT environment. Enterprises can begin their digital transformation journey with very simple and functional solutions that deliver reliable results, and then scale to address more complex tasks and process workflows as the organization grows into a more efficient digital workplace.

HOW DOES AUTOSTORE WORK?

AutoStore utilizes your existing infrastructure and captures information from a wide range of device platforms, including:

- Multifunction peripherals (MFPs)
- Smartphones
- Emails
- Fax servers
- Shared/public folders
- FTP sites
- Microsoft® Office® applications
- PC desktops
- XML data streams and other sources
- Online web forms

Captured information can be processed based on predefined business rules that determine how the information is saved, stored, processed, and routed. Scanned images can be enhanced for improved readability, text can be converted into editable electronic information, and barcodes can be read, resulting in rich information to be added to important business system records, or for later retrieval. Processed documents and resulting index data can be distributed to several locations, including:

- Fax and email messages
- Enterprise systems for resource planning (ERP), customer relationship management (CRM), and content management (ECM)
- FTP sites and secure network folders

Data and corresponding documents can even be routed to multiple destinations simultaneously and selectively. These automated tasks are performed effortlessly with the push of a button from any supported device platform, including an MFP front panel. Automated workflows start immediately, ensuring your information goes where you want it to go quickly and accurately every time.

WHAT SETS AUTOSTORE APART

Broad Multi-vendor MFP Support¹

AutoStore works with all major office multifunction printer (MFP) manufacturers, making it easy to add or change devices without the need to install and configure new software, saving time and reducing costs for administrators. Workers benefit with a consistent user experience across devices, regardless of brand.

Multichannel Support

AutoStore supports a wide range of document and information capture channels, including office MFPs, mobile phones and tablets, Windows desktop PCs, Microsoft® Outlook, desktop scanners, fax servers, and more, enabling distributed workers to work how, when, and where they work best, while still adhering to consistent business rules and policies.

Bi-directional Database Lookups

Easily search and retrieve database information for display on the MFP panel, Windows desktop, or mobile device. With the database lookup capability, the value entered in one index field triggers a database search to fill the other fields automatically, accelerating the indexing task while delivering exceptional accuracy.

Business Process Automation, Workflow Support

AutoStore can automate your document-driven business processes to help lower costs, improve operational efficiency, communication, and collaboration, and help maintain compliance with laws and regulations.

System Connectors²

AutoStore seamlessly connects to 40 popular enterprise software applications, increasing the volume and accuracy of information that flows into those systems. AutoStore connectors are free and directly supported and maintained.

Native LDAP Integration

From any supported MFP, AutoStore users can browse your company contact list or search by domain name to return a selectable list of addresses. Just select and confirm to scan securely to one or multiple addresses.

Tungsten Equitrac Integration

AutoStore is integrated with the Equitrac print management and cost recovery solution, enabling user and activity tracking, as well as unified authentication, from any supported MFP. This helps reduce the administrative burden on IT and provides robust audit tracking capabilities to monitor and track compliance to business and regulatory rules.

AutoStore is the most versatile document capture solution available, enabling your digital office experience from the widest range of hardware and software platforms to provide a comprehensive document and information onramp to a successful information management strategy.

KEY CAPABILITIES

- ✓ Common user experience across multiple capture channels (desktop, email, MFP, mobile, etc.)
- ✓ Works with all major MFP manufacturers
- ✓ Microsoft® authentication support
- ✓ Bi-directional database integration
- ✓ Image correction
- ✓ Barcode recognition
- ✓ OCR processing
- ✓ Document conversion
- ✓ Electronic forms processing
- ✓ 40+ pre-built business system connectors
- ✓ Pre-built cloud storage connectors (Box, Google Drive, Microsoft® OneDrive and SharePoint, etc.)
- ✓ Customizable mobile interface
- ✓ Business process automation and workflow support

BENEFITS OF AUTOSTORE

AutoStore is an enterprise document capture and workflow automation solution that transforms static documents into actionable digital information to deliver several key benefits, including:

- ➔ Security controls for your business information to help prevent unauthorized use, and maintain the organization's reputation and customer trust.²
- ➔ Increasing the productivity and efficiency of your workforce by enhancing and enriching information quality and detail, while simultaneously reducing errors and redundant manual tasks associated with managing and processing document and information.
- ➔ Ensuring that your operational processes remain compliant by automatically applying consistent business rules and tracking the movement and use of documents and information.
