

TUNGSTEN POWER PDF ADVANCED

Product Summary

THE ALL-IN-ONE ENTERPRISE PDF SOLUTION

Tungsten Power PDF™ is a comprehensive document management tool for all business users—a single product that's easy to use for simple tasks, and robust enough to handle the most demanding requirements.

POWER PDF ADVANCED ADVANTAGES

Immediately familiar user interface enables quick adoption and boosted productivity

With a Microsoft® Office-style ribbon, Power PDF Advanced provides ease-of-use familiarity enhanced by customer input over twenty years. The Quick Access Toolbar lets you conveniently create shortcuts to features and capabilities.

Accurate document conversion saves time and effort

The latest Tungsten OmniPage OCR delivers peak performance in converting PDFs and scanned files to Microsoft Office. Find results in two ways: pinpoint text accuracy on poor images helps save time proofreading, and optimized format accuracy helps reduce manual effort in correcting headers, footers, numbering, tables, and more.

New: Deployment via Power PDF Advanced Volume Subscriber Access License (SAL) Server (Advanced Volume only)

Deploy Power PDF with SAL licensing to Windows named users via License Server to support for user and term management (term pricing available). SAL enables true oversight of license accounting and server-based expiration dates.

New: Fuzzy Search capability

Perform a proximity search instead of exact search. Expand your results to find typos, different word orders, etc.

New: Power PDF Mobile

View and work with PDF files whether you are on a Microsoft Surface or an Apple iPad.

BENEFITS OF POWER PDF ADVANCED

Don't labor over PDF conversion to Microsoft Office

Converting the text and then spellcheck quickly fixes text errors. Don't worry about formatting errors—Power PDF vastly boosts productivity by delivering high format fidelity in Microsoft Word®, Excel® and PowerPoint®.

Utilize latest PDF security and enterprise rights management¹

Protect PDFs with password permission and certificate security controls up to 256-bit AES encryption. Support for Microsoft Information Protection Services and Microsoft Azure Rights Management Services.

Redact sensitive information and remove metadata

Dependable and flexible redaction via pattern search and metadata scrubbing to help protect confidential information.

Automate repetitive action sequences with batch and watched folder processing

Employ watched folders for automated creation from all supported source files. Use batch processing with sequences for sophisticated document actions like extracting pages by search terms.

KEY CAPABILITIES

- ✓ Work intuitively in a familiar Microsoft Office-style user interface
- ✓ Assemble documents from Microsoft Office and image files via page preview selection
- ✓ Create PDF documents compliant with the latest PDF 2.0 and PDF/A-4 standards
