**CANON LABEL SOLUTIONS**  
STICK WITH CANON

## CANON'S DEDICATION TO LABELS

From niche specialty labels to high-volume flexo runs, Canon's got you covered. Whether you're just starting out or scaling up, you can easily upgrade to a higher-volume printer—or choose a specialized model for short-run precision. Whatever your labeling needs are, we've got a solution that fits.

### Low-Volume Specialty

#### LX Series Desktop Printer

*Up to 4" Water Based Inkjet*

##### **Small format on-demand label printing**

Dye and pigment based color label solutions for clear and vibrant labels on demand. The LX series printers are great for printing short runs and can help you save on storage space and labor costs.

#### imagePROGRAF series

*Up to 60" Water Based Inkjet*

##### **Large format batched label printing**

Canon imagePROGRAF large format printers are ideal for small print shops and in-plant departments producing low-volume specialty labels thanks to their vivid color reproduction. Combine the pigment-based ink set with water resistant media, and these printers are excellent for signage, packaging proofs, and labels. Paired with Canon's PosterArtist software, users can easily create custom signage using templates, royalty-free images, and intuitive tools—outstanding for professional and personalized applications.

## Mid-Volume Specialty

### Colorado M-Series

*Up to 64" UV gel inks*

#### Large format batched UV label printing

The Canon Colorado printer series is designed to deliver fast, high-quality short-run sticker and label production with UVgel technology, FLXfinish+ for dynamic spot gloss finishes, and FLXture for rich, tactile textures that mimic screen printing. Its speed, reliability, and versatility make it a cost-effective powerhouse for diverse customer demands with standout visual impact.

## Mid-Volume Digital

### LabelStream LS2000

*Up to 13" Digital, Water Based Inkjet*

#### Digital inkjet roll to roll label press

Designed to serve the surging demand for digital, high-quality label converting. The LabelStream LS2000 implements many newly developed Canon technologies highlighted by high-density aqueous ink, thermal printheads, advanced fixing system, and a variety of automation features to support efficient production.

## High-Volume Flexography

### Edale LabelLine Series

*14" & 22" Flexo, Aqueous & UV*

#### Flexographic roll to roll label press

Edale LabelLines modular flexographic printing and converting systems, engineered for label printers targeting the medium to long-run market. With a highly configurable design that integrates the full spectrum of printing and finishing technologies, LabelLines give you the flexibility to meet today's diverse applications and to stay ahead of evolving market demands as your label volumes increase.

# STICK WITH CANON

Canon is deeply committed to advancing the label industry by offering innovative, high-quality solutions that help meet the evolving needs of business across the globe. With a strong heritage in imaging and printing technologies, Canon brings precision, reliability, and efficiency to label production through its cutting-edge printing systems. From short-run customization to high-volume applications, Canon's label solutions are designed to enhance productivity, reduce waste, and support sustainability goals. Backed by a robust service network and a customer-first approach, Canon continues to empower label converters with the tools they need to thrive in a competitive marketplace.
