

OPERATIONAL-CRITICAL IMAGING FOR STATE AND LOCAL GOVERNMENT

NASPO ValuePoint, PEPPM, OMNIA, and Local Contract Vehicles Available

Canon U.S.A., Inc. provides state, county, and municipal agencies with high-performance hardware and software with security features to help modernize operational workflows. From city hall to the home office, we offer the reliability required to support the service demands of your constituents while helping protect sensitive community data.

The imageFORCE Advantage: Next-Gen Operational Imaging

Canon's imageFORCE platform represents the pinnacle of office technology, moving beyond traditional laser printing to provide outstanding precision and intelligence for state and local operational environments.

Identity-centric Security

To help protect sensitive citizen data, imageFORCE devices support secure badge authentication and MFA integration. This helps ensure only authorized personnel access functions, serving as a gatekeeper for HIPAA, CJIS, and FERPA-regulated data.

D² Exposure Technology (OLED)

The imageFORCE series¹ utilizes OLED technology so it can achieve a resolution of 4800 x 2400 dpi. This helps ensure property maps, infrastructure schematics, and evidentiary imagery are reproduced with forensic-level clarity.

Specialized Media Versatility

Enhanced handling for heavy stocks and waterproof synthetics supports diverse operations. This is ideal for durable field manuals for public works, secure transit signage, and emergency management materials.

Eco-conscious Sustainability

Containing recycled material, imageFORCE devices help local governments meet "green procurement" goals and EPEAT® Gold¹ compliance.

The FedRAMP Edge: Canon Office Cloud

Canon offers a FedRAMP-authorized (moderate level) cloud service platform. This is a critical distinction for agencies requiring a moderate-level Authority to Operate (ATO).

uniFLOW Online

This solution allows agencies to eliminate on-premise print servers while maintaining strict security protocols.

Secure Pull Printing

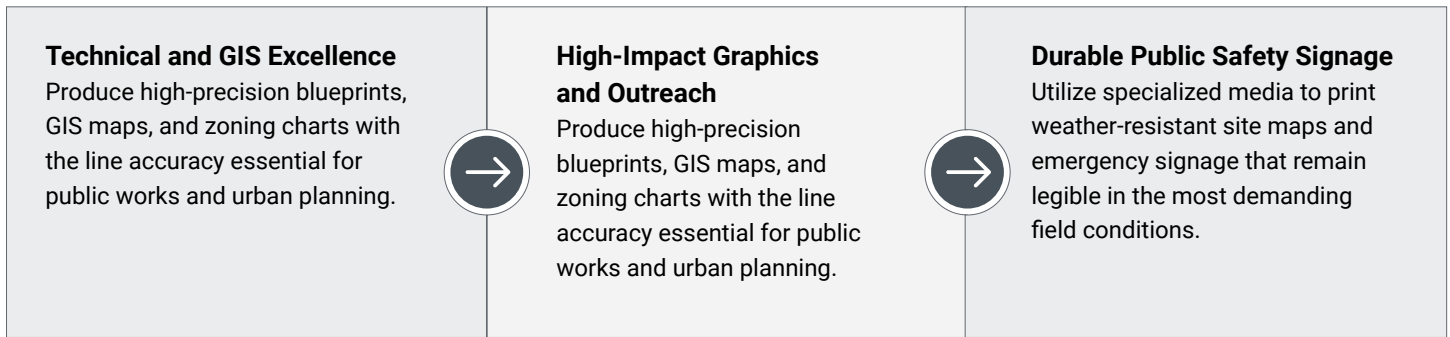

Documents stay in an encrypted queue until the user authenticates at the device, to help ensure sensitive data is not left unattended.

Standardized Security

As a FedRAMP-authorized provider, Canon adheres to rigorous, standardized security assessments and continuous monitoring, helping to reduce the compliance and audit burden on your IT staff.

Canon Large Format: Infrastructure and Graphic Communication

Canon's large-format portfolio empowers agencies to scale their messaging and technical precision across all departments.

High-volume Production: Centralized Operational Output

For municipal print shops and high-volume agencies, Canon's **imagePRESS** and **varioPRINT** solutions help provide the industrial-grade reliability required for large-scale constituent communication.

Mass Distribution

Rapidly produce mission-critical materials—such as jury summons, tax assessments, and public health mailings—with automated in-line finishing.

Engineered Reliability

The **varioPRINT** series utilizes a low-heat, high-uptime* engine designed for the demands of state and local government document centers.

PRISMA Workflow

Centralizes control of the print fleet, helping to streamline job onboarding and reduce manual labor costs for in-house municipal centers.

*Many variables can impact results and uptime and results and actual uptime may vary based on equipment, circumstance, and environment.

Core State and Local Solutions

Solution Category	Key Benefits for State and Local Government
Multifunction Printers (MFPs)	imageFORCE systems featuring FIPS 140-2/3 validated encryption and automated data erase.
Large Format (LFP)	High-precision plotters for GIS/CAD and vibrant graphic printers for public outreach and durable signage.
Production Presses	High-speed digital presses for centralized print facilities and large-scale document distribution.
Document Scanners	imageFORMULA solutions designed for the heavy workloads of Courts, DMV, and Human Services.
Sustainability Mandates	EPEAT® Gold and ENERGY STAR® certified devices to help meet local energy efficiency mandates.

Ready to modernize your document environment?
