

3 REASONS TO CHOOSE A FEDRAMP-AUTHORIZED PRINT MANAGEMENT SERVICE

1 FEDRAMP AUTHORIZATION IS REQUIRED FOR CLOUD ADOPTION

- Government agencies looking to move to the cloud need to choose a service that has been tested and verified via a risk and authorization management program such as FedRAMP.
- FedRAMP follows NIST SP 800-53 controls, and authorized providers must undergo continual monitoring and auditing for compliance.
- FedRAMP-authorized services can be found on the [FedRAMP Marketplace](#).

2 FEDRAMP CAN ASSIST WITH IT ADMINISTRATIVE TASKS

- Support reduction in managing physical hardware/server infrastructure, software licenses, upgrades, security scanning, and associated labor. Agencies will simply manage an internet connection to obtain secure print, scanning, and/or fleet management capabilities.
- Help lower the cost of product selection by reducing the amount of security validation a customer must perform. FedRAMP-authorized systems are already validated against a known set of standards that can be verified.
- Help save time and effort for security evaluation. Since FedRAMP is a known standard applied across state governments, using a FedRAMP-authorized service can help to reduce separate security evaluation requirements for each agency.

3 PRINT MANAGEMENT CAN SUPPORT AN AGENCY’S MANAGED PRINT SERVICE (MPS) STRATEGY

- **Flexible Authentication** – such as support for Proximity Card and PIN.
- **Secure Print Feature** – a local client keeps print jobs on the agency’s local network.
- **Print From Anywhere Functionality** – jobs can be printed from PCs or email-based printing and “follow” users to any printer.
- **Document Scanning** – allows users to scan documents to themselves and to FedRAMP-authorized cloud storage services.
- **Zero Trust Strategy** – increasing security to close the print security gap and reduce internal threats.
