Finishing Recommendations

For best results from printing with the ColorWave series printers, cold laminates (<140˚F) are advised and a laminator with a soft rubber roller is preferred.

For best results with traditional aqueous printing systems, you can either use cold laminates or low temperature laminates (<200˚F).

Hot film laminates, liquid laminates, and transfer laminates are not recommended.

This information is presented as a general guide and is not a performance guarantee. The user should determine prior to use the suitability of the material for the specific application or purpose.

Printer/Ink Compatibility

7PHPRL is recommended for use with CrystalPoint technology in the ColorWave series printers and and also compatible with traditional aqueous and Latex print technologies.

Profiles

On the ColorWave series printers, please select the 7PHPRL profile. For traditional aqueous inkjet media, please choose Satin Photo Paper 190 gsm.
