## CANON BROADCAST ZOOM LENSES

# Celebrating Canon's Storied History

### Development of Broadcast Zoom Lenses

In 1958, Canon launched its broadcast lens business by introducing the innovative high zoom ratio 6.7 IF-1 lens. Ever since, Canon has continued to listen to the demands of broadcasters and cinematographers around the world by developing lenses based on industry trends.

### Canon's Emmy®-Winning Lens Technology

Canon's highly regarded lens technology is a recipient of the Technology and Engineering Emmy® Award. The National Academy of Television Arts and Sciences awarded Canon a Technology & Engineering EMMY® Award in 2005 in recognition of our engineering creativity in Lens Technology Developments for Solid State Imager Cameras in High Definition Formats. We also received an EMMY® in 1996 for *"Implementation In Lens Technology to Achieve Compatibility with CCD Sensors."* In addition, we received an EMMY® in 2017 for "Large Format 4K Zoom Lenses".

# Canon Broadcast Lens Technology

## Optical Performance

### Superb Optical Materials Produce a High-Performance Lens

#### Fluorite · UD Glass · Hi-UD Glass

Unlike conventional optical glass, Fluorite has remarkably low dispersion properties. Realizing the effectiveness of Fluorite glass, Canon has put it to practical use in many lenses, primarily in the anterior section of zoom lenses to help correct telephoto chromatic aberration. Both UD<sup>1</sup> glass and Hi-UD glass<sup>2</sup> have dispersion properties similar to Fluorite and are effective for correcting chromatic aberration. Due to its high refractive characteristics, Hi-UD glass is especially known for its spherical aberration correction. Used in the anterior and zooming sections of a lens, Hi-UD glass is effective for controlling aberration fluctuation seen when focusing and zooming.

<sup>1</sup> UD-Ultra Low Dispersion.

<sup>2</sup> Hi-UD High Index Ultra Low Dispersion.

### Air Sphere Coating

In the context of HDR Optical imaging, Air Sphere Coating (ASC) technology is a critically important new innovation in broadcast field lenses. This is a Canon-developed technology that is an additional layer deposited on top of the normal multilayer coatings that are used to minimize numerous internal reflections that conspire to lower light transmission efficiency and to contaminate deep black reproduction. ASC is an ultra-low refractive index silicon dioxide film that includes microscopic air spheres having a sub-nanometer diameter arranged in regular structure. Because

these spheres are microscopic when comparing to the wavelength of visible light and as they are in an ordered array, light does not scatter. In combination with the multilayer coatings, ASC achieves far lower reflectance and significantly reduces flare and ghosting.

### Bokeh Effect

When shooting in macro, the focus position of the lens can be changed as the focal length is adjusted, when using the optional MCJ-S02 Macro Controller, creating a bokeh effect. This built-in feature can be utilized to support special techniques in which the focus position can be shifted within the same shot just by using the Macro Controller, allowing for subtle creative defocus effects. This can help provide a degree of creativity when shooting live events such as a concert.

### High Quality, Compact Size and Weight

#### Large Aperture Aspheric Lens

Spherical aberration will increase as the diameter of a spherical lens increases. However, aspheric lenses form an ideal shape for aberration correction and are the desired lens type for improving optical performance. As they are more compact, aspheric lenses reduce the weight of the entire lens system. Through its optical design and large aperture processing techniques, Canon has developed compact, large aperture, high magnification field zoom aspheric lenses. As a result of this development, all high-magnification field zoom lenses released since 2000 have a constant total lens length regardless of zoom ratio.

### Focus Breathing Suppression

#### Constant Angle Focusing System (CAFS)

CAFS is a technology that suppresses view-angle fluctuation (breathing) while focusing. The Zooming Effect of Focus is the phenomenon where the picture size (angle of view) changes when focusing. Canon's 32-bit CPU calculates and controls the zoom when focusing in order to counteract this phenomenon. As a result of CAFS, the UHD-DIGISUPER and DIGISUPER Series has zero Zooming Effect of Focus.

## Advanced Design Technology to Help Minimize Various Aberrations

### Image Stabilizer (IS)

Canon launched its first field zoom lens with a shift type anti-vibration mechanism in 2000\*. Prior to that, Canon introduced the IS-20B anti-vibration adapter for portable zoom lenses. Those cutting-edge technologies, along with the Vari-angle Prism image stabilizer (VAP-IS) lens, helped to usher in the era of optical image stabilization in broadcasting lenses.

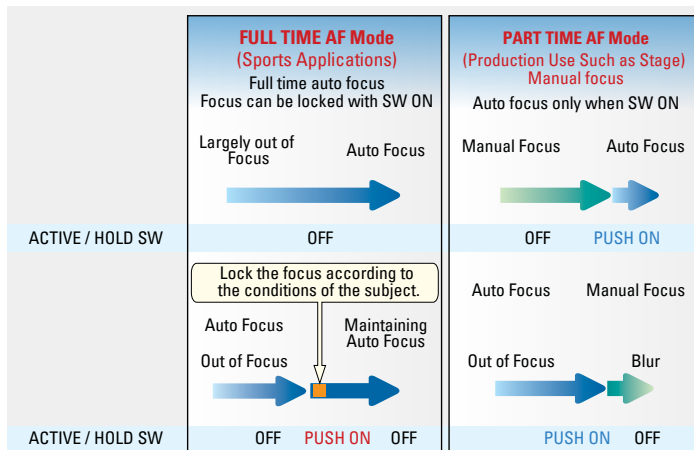

*\*Adopted for DIGISUPER 86 XS (XJ86 × 9.3 B). The world's first field zoom lens for broadcasting.*

## Auto Focus

### TTL Secondary Imaging Phase Difference Detection Method

The Secondary Imaging Phase Difference Detection Method, also used in single lens reflex EOS camera lenses, was adopted for broadcast autofocus systems. As a result of this Method, Canon's Auto Focus System has excellent focusing accuracy within the entire zoom range, along with outstanding focusing speed. Due to high performance servo motors, tracking a moving object at high speed can be possible even from a largely out of focus state.

### Autofocus Two Types of Operation

### AF Mode

Select DIGISUPER lenses provide two autofocus modes. "FULL TIME AF" provides continuous autofocus operation allowing the camera operator to focus on framing the subject. "PART TIME AF" allows for temporary autofocus use with manual focus. The modes can be switched on and off as needed, using the ACTIVE/HOLD switch.

### AF In-Focus Display

By using the FDJ - S41 dedicated focus demand, you can change the size (3 options) and position of the AF in - focus frame displayed on the viewfinder\*.

*\*To change the in-focus frame, it is necessary to interlock with the camera.*

## Digital Technology

### Digital Servo System/Digital Drive Unit

Since the release of the DIGISUPER 70 in 1995, Canon has been a leader in digital broadcast zoom lens control. Canon's ENG/EFP lenses, having the same digital technology, offer a wealth of features to make shooting more efficient. Canon's digital drive unit is installed in all ENG/EFP and Provideo broadcast lenses.

### Shuttle Shot

At the touch of a button, this feature allows the operator to zoom back and forth instantly between any two positions at the maximum speed or at any speed memorized in the Speed Presets.

### Frame Preset

With the Frame Preset feature, a preset frame position can be saved and repeated multiple times.

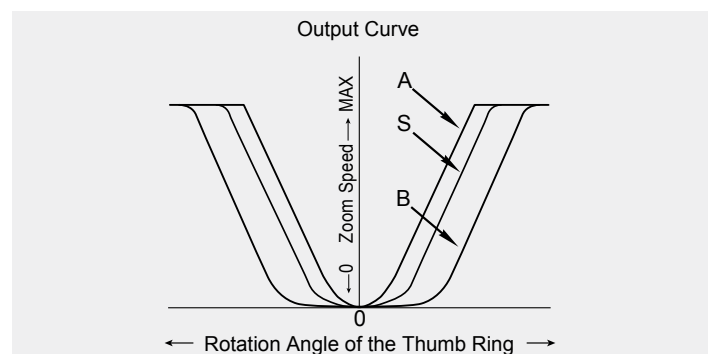

### Speed Preset

Simply press a button to recall the preset zoom speed.

### Zoom Servo Characteristics

Zoom Servo characteristics can be selected from three curvature options on the ZDJ-G01/S01 zoom demand.

Zoom Servo Characteristics Example

## Virtual Studio System

Canon has a series of HDxs and HDGC (IRSE/IASE version) lenses which are equipped with a digital drive unit. The 16-bit resolution rotary encoder built into the drive unit can be integrated into a virtual studio system. The encoders enable precise control as the zoom servo has a range of 0.5 second quick zooms to over a 5 minute super slow zoom. Repeatability in focus and iris control are also precise. Canon's technology has made the encoder device very small, allowing it to be installed in the existing drive unit without adding size or weight.

## Further Improving Operational Efficiency

**Canon's next-generation drive unit, the e-Xs V Type T, introduced together with the CJ27ex7.3 B<sup>1</sup>, has the following new features:**

- USB-C port: allows drive unit settings, maintenance records and lens information to be saved to an external drive
- Angled 20-pin connector making for easier connectivity, less interference; allows the camera/lens to be placed on a flat surface
- The lens LCD display is now conveniently located on the top of the drive unit
- Updated and re-organized LCD display menu
- Faster Iris speed
- Focus breathing compensation can be turned on/off

### Type T and Type S Drive Units share these common features:

- Matches the aberration correction function on the camera without initialization at power-on
- Reduced power consumption by about 10%<sup>2</sup> when using a battery as compared with previous versions
- Real and virtual images can easily be calibrated with high-precision position detection
- Three 20 PIN connectors allow for simultaneous full servo and virtual system operation
- Easy operation with straightforward menu and display

## Zoom Track

The zoom control range can be set within a more limited range on both the telephoto and wide-angle sides of UHD-DIGISUPER and DIGISUPER Series lenses. With these lenses and the optional ZDJ-G01/S01 zoom demand, the zoom range can be set to virtually any range smaller than the full focal range of the lens. If not used to limit the zoom range, the feature can be used to memorize an additional preset zoom position.

## Ergonomic Design

### Compact and Lightweight Drive Unit

The grip design is ergonomic, providing an outstanding feel during operation. Additional space in the focus ring area makes manual focusing easier. The grip is positioned close to the optical axis of the lens to reduce fatigue.

Ergonomic design allows the camera operator's left hand to easily access the focus ring for manual operation.

<sup>\*1</sup>: Refer to p. 18 for more information on the drive unit and the CJ27ex7.3B.

<sup>\*2</sup>: When zoom, focus & iris in operation.

# THE ERA OF ENHANCED HDTV AND UHDTV

## BCTV LENSES DESIGNED TO SUPPORT 4K UHD CONTENT CREATION

HDTV is now firmly established worldwide and HD production is expected to continue. Ultra HDTV – generally referred to as UHD – has more recently emerged as the next generation of enhanced television service. In 2015 the International Telecommunications union published their ITU-R BT.2020 standard “Parameter Values for UHDTV Systems for Production and international Program Exchange” – that included both 4K UHD and 8K UHD production formats. This standard includes a Wide Color Gamut (WCG). In 2016 they published the ITU-R BT.2100 standard “Image Parameter Values for High Dynamic Range Television for use in Production and International Program Exchange”. This standard specifically applies the High Dynamic Range (HDR) to the HD, 4K UHD, and 8K UHD production formats (all exclusively progressive scan). In September 2017 the industry body – Ultra HD Forum – published their updated Guidelines on technologies and practices that support a commercially deployable Ultra HD real-time linear service with live and pre-recorded content in 2016, which is termed a “UHD Phase A” service. They include 4K UHD and 1080P HD (that includes both HDR and WCG).

These standards and guidelines have spurred increasing attention to the adoption of 4K UHD origination of sports, concerts, and major events. The anticipated protracted coexistence of HDTV and UHDTV has spawned a new generation of 2/3-inch multi format broadcast camera systems – from most of the major international camera manufacturers – that can selectively originate HD or UHD. To support this new era of mixed HD / UHD origination Canon has invested heavily into the development of an array of 2/3-inch 4K UHD broadcast lenses that encompass long zoom field lenses, a studio lens, and a broadening family of portable lenses.

*Simplistic mapping of the performance levels within the separate categories of box*

STUDIO / FIELD BOX LENSES			EFP / ENG PORTABLE LENSES		
LENS SERIES	PERFORMANCE		LENS SERIES	PERFORMANCE	
UHD <sub>XS</sub>	4K Premium	↑ 1080P/HDR/WCG	UHD <sub>XS</sub>	4K	↑ 1080P/HDR/WCG
UHD <sub>XS</sub>	4K		UHD <sub>GC</sub>	4K	
HD <sub>XS</sub>	HD		HD <sub>XS</sub>	HD	
		HD <sub>GC</sub>	HD		

*lenses and portable lenses.*

## IMPLICATIONS OF HDR AND WCG

Delivering the requisite high image sharpness required for 4K UHD – while simultaneously lowering traditional optical aberrations (that can be more exposed by the high resolution image sensors) – called for multiple innovations in lens design

and manufacturing. Lateral chromatic aberration causes color misregistration on high contrast edges within the imagery – especially toward picture extremities. Longitudinal chromatic aberration causes color fringing on any speculars with this imagery. HDR and WCG further enhance the visibility of these aberrations – because of the elevation in the color volume of the camera video – placing a greater onus on suppressing them to where they become subjectively invisible.

**HDR**

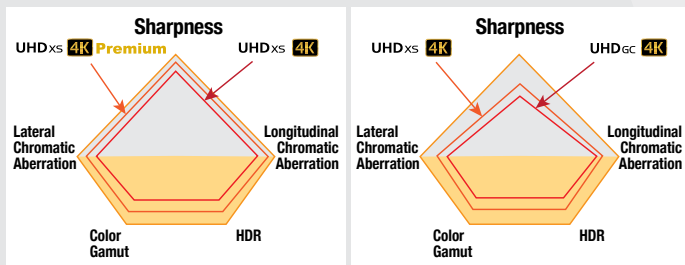

To support HDR the lens must accurately reproduce scene speculars and minimize optical artifacts stimulated by strong scene highlights.

**UHD LENS PERFORMANCE HIERARCHY**

In the case of the large box field and studio lenses and the portable EFP/ENG lenses Canon has created two performance levels in each. A special priority is assigned to elevating image sharpness (the essence of 4K UHD). An attendant high priority underlies design strategies that aggressively curtail the visibility of the two chromatic aberrations. Higher luminance levels and allied greater color volume associated with HDR / WCG combine to elevate the visibility of even small levels of these chromatic aberrations.

In the case of the Box lenses advanced design strategies allied with advanced optical glass materials are mobilized to maintain high image sharpness across the image plane, over the total focal ranges, and over a wide range of object distances. The 4K PREMIUM box lenses take these strategies to a particularly high level to further tighten those optical performance specifications.

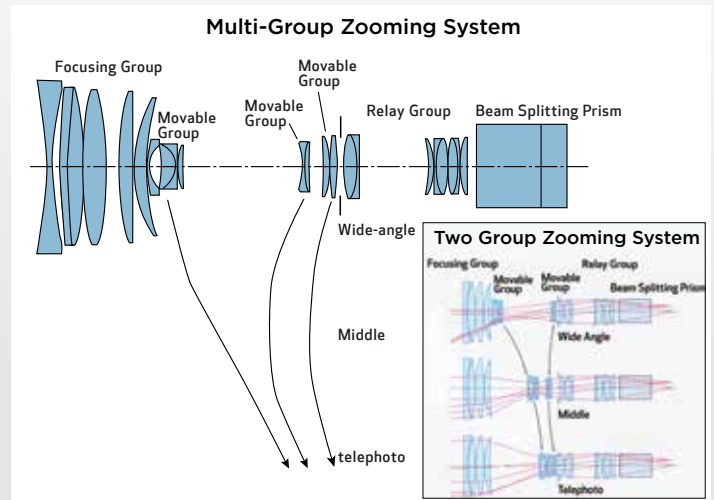

In the case of the portable lenses, similar priorities apply. The UHDxs manifests higher sharpness and lower chromatic aberrations when compared to the UHDgc – although on a different scale to the box lenses.

**MULTI-GROUP ZOOMING SYSTEM**

In seeking longer focal ranges for the box field and studio lenses and some of the longer focal length portable lenses, challenges in achieving the requisite zooming speeds while also achieving UHD performance were escalated. This called for a radical new design approach to the zooming optical subsystems. The

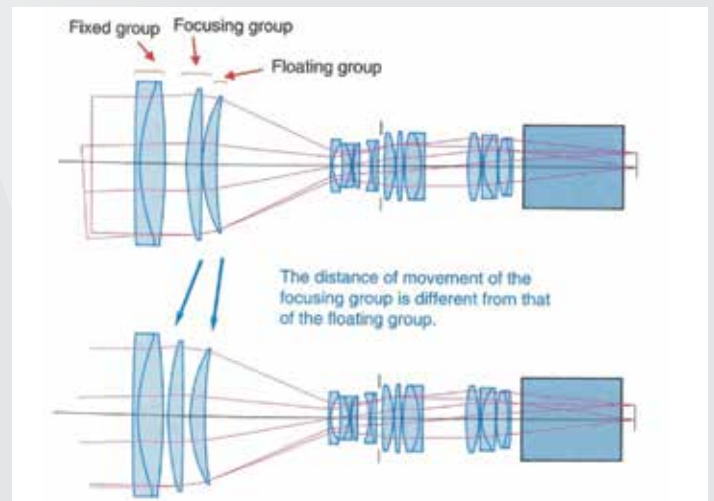

central goals were to achieve greater control over multiple lens aberrations to help ensure full 4K performance while at the same time expediting an increase in the speed of the zooming action (when the digital drive unit is set to maximum zoom speed).

The traditional two group zooming system (right picture) is being replaced with a three group zooming system (left picture). Three movable groups move differentially with respect to each other over the zoom range. Design optimization consisted in balancing the weight of the three individual groups with their stroke distance during zooming action.

**FLOATING FOCUSING SYSTEM**

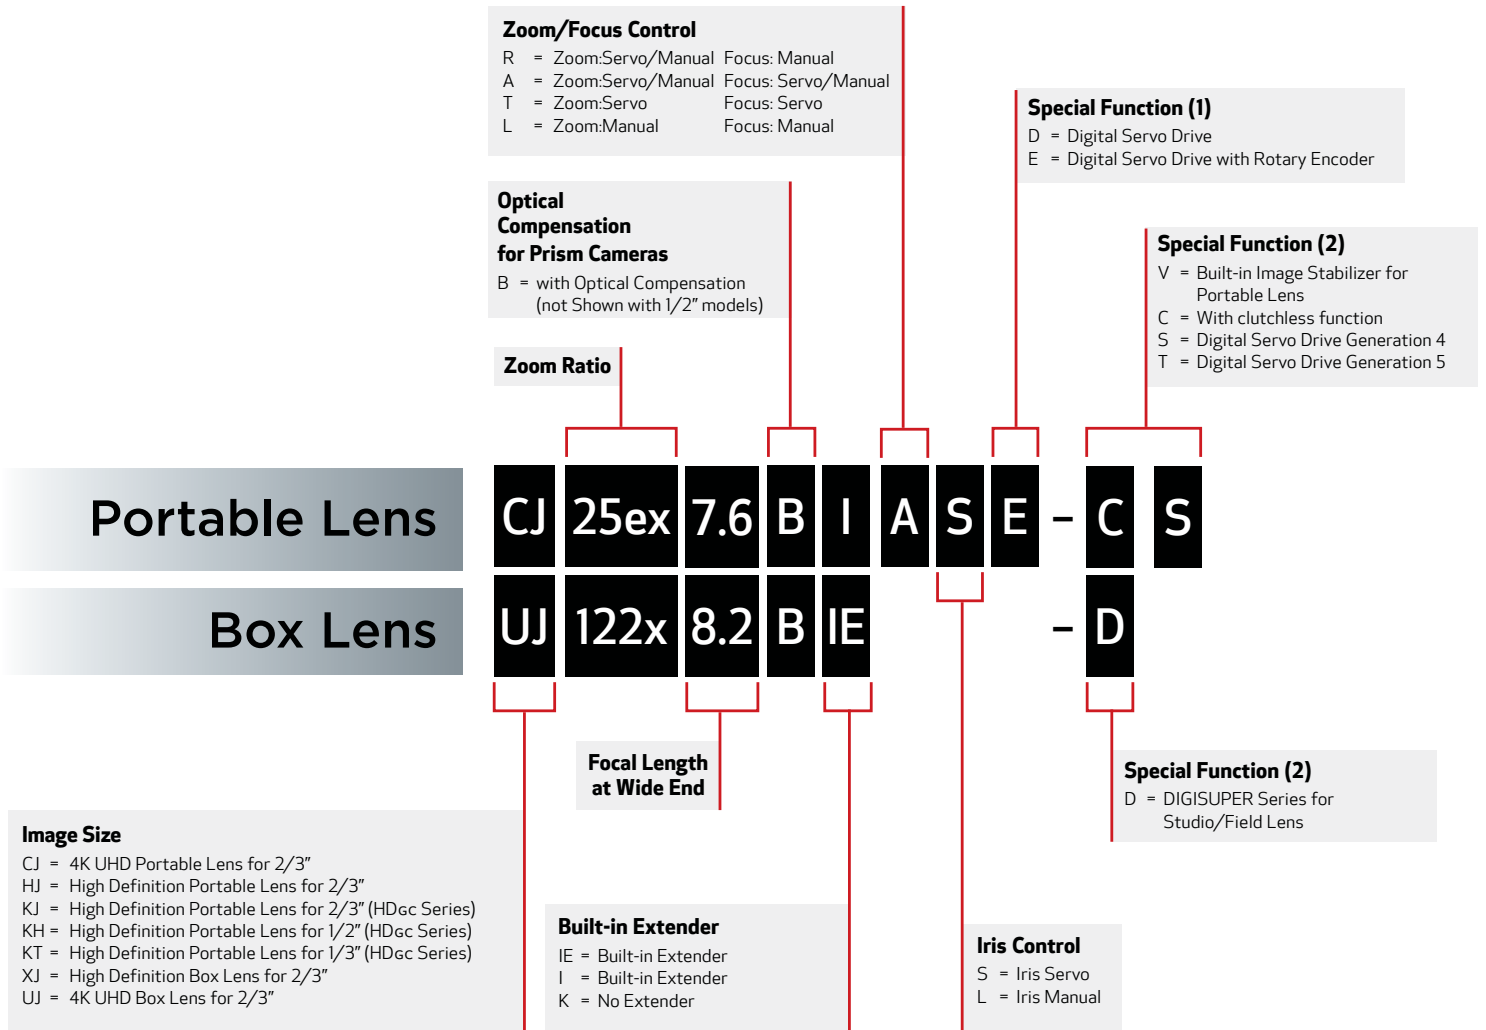

The focus optical subsystem entails high responsibility for numerous optical performance parameters and operational considerations. The lens maximum relative aperture is largely determined by the diameter of this lens input optical grouping. In addition, focus breathing (undesirable alteration to the field angle as the focus control is actuated) characteristics and aberration behavior are associated with this optical subsystem. Overall lens size and weight are heavily proportional to decisions made in the overall design of this system. Central to the design is curtailing the size and weight of the moving lens system. To help ensure UHD optical performance focus fluctuations must be suppressed – and this was accomplished by using two separate moving groups.

New innovations in a floating focus group support 4K UHD performance while curtailing size and weight

\* M.O.D. = Minimum Object Distance.

## UHD-DIGISUPER 122 AF, UHD-DIGISUPER 122: HIGHLIGHTS

### High Zoom Ratio and Long Focal Length

While displaying performance that surpasses 4K, the lens has the high zoom ratio (122x) and long focal length (1000 mm) desired by many in television production.

### Elimination of Image "Lag" Following Operational Pan/Tilt Movements

The image stabilization system must be capable of distinguishing between unwanted physical perturbations to the lens-camera system and operational control of panning and tilting of the same. In the UHD-DIGISUPER 122 lens new correction strategies have been implemented. As a result, the vibration component of the sensor detection signal and the panning operation component can be separated rapidly and with high accuracy.

### Ideally Suited to 4K Shooting

Lens is ideally suited for 4K UHD shooting required when telecasting live sports events and other applications.

### Air Sphere Coating (ASC) Technology

This is a Canon-developed technology that is an additional layer deposited on top of the normal multilayer coatings that are used to minimize those many internal reflections that conspire to lower light transmission efficiency and to contaminate deep black reproduction.

### High Speed, High Precision Auto Focus

The UJ122AF's high-precision auto focus is enabled with Canon's Motion Tracking Feature.\*

\* Available only on UJ122AF

The UHD-DIGISUPER 122AF is compatible with the FDJ-S41 Focus Controller which allows for adjustment of focus modes (OFF/ Full Time/Part Time) and setting the size and area of the focus window.

### Compatibility with HD Lens Systems

The lens enables the use of the same Canon standard controllers for zoom and focus as well as servo modules currently used by HD equipment. It comes with a 20-pin connector compatible with virtual units and that enables high-accuracy position information of the zoom, focus and iris to be read out.

# ZOOM DEMAND: Highlights

ZDJ-G01    ZDJ-S01

### Main Features

#### Frame Preset/Shuttle Shot/Speed Preset

This function moves to a preset zoom position with the push of a switch. Frame preset and shuttle shot each moves at maximum speed, while speed preset moves at preset speed. Letting go of the switch in shuttle shot returns to the original position. Moving speed with framing preset can be set with the ZDJ-G01.

#### Zoom Track

Zoom control range can be set for both the wide angle and telephoto sides, to control zoom range required for actual shooting.

The Unit pictured is the ZDJ-G01  
\*1: Not available on the ZDJ-S01  
\*2: This is a framing preset switch on the ZDJ-S01

## Control Accessories for Studio/Field Lenses

# DIGITAL UHD-DIGISUPER/DIGISUPER Series

For:  
DIGISUPER 122AF

For:  
UHD-DIGISUPER 122 / UHD-DIGISUPER 111 / UHD-DIGISUPER 90 /  
UHD-DIGISUPER 66 / UHD-DIGISUPER 27 / DIGISUPER 95 TELE /  
DIGISUPER 95 / DIGISUPER 80

### FULL SERVO SYSTEM

### FDJ-S41 FOCUS DEMAND

AF MODE change-over switch  
(OFF/FULL TIME/PART TIME)

Operation Knob

AF Frame Adjustment Joystick

AF ACTIVE/HOLD Switch

AF Tracking Adjustment Knob

Multiple Communication Capability with Compatible Cameras

Torque Adjustment Knob

### BOKEH EFFECT CONTROLLER

\*1: Switch Box is optionally available. The equivalent switches are integrated into Zoom Demands. It is recommended to have the Switch Box with Full Manual System.

\*2: Lens Supporter is necessary for portable camera mounting. Some cameras need separate power supply for zoom and focus servo operation.

• Zoom Demand and Focus Demand with Pre-set Box is also available.

• For detail information, please contact a Canon Sales Office.

## Studio/Field Lenses Mount Compatibility

### To Use Camera Manufacturer's Original Mount Lenses

Studio/Field lenses are made with mounts corresponding to each manufacturer's Studio/Field cameras. To make the lenses compatible with Portable Studio/Field Companion cameras, the correct lens Support System must be chosen from the following:

*Please confirm with camera manufacturer regarding the proper supporter to use. Some manufacturers vary by camera model.*

## CJ27e×7.3B IASE: Highlights

### High Optical Performance

Excellent optical performance for 4K cameras that maintains high resolution from the center of the image to the periphery.

### Suits a Variety of Shooting Needs

Combination of 7.3mm wide angle and a class-leading\* 27x zoom magnification with the portability of an ENG lens.

### Next-Generation e-Xs V Drive Unit

A new design with more advanced features and improved ergonomics.

### Built-in 2x Extender

4K Optical performance is maintained even when the 2x extender is engaged.

## e-Xs V DRIVE UNIT: Highlights

### Focus Breathing Compensation

A new feature which minimizes image distortion when racking focus. This setting can easily be turned on or off depending on preference.

### Angled 20-pin Connector

Allows the camera to be placed on a flat surface with a 20-pin cable connected.

### New USB-C Port

Allows Drive Unit settings to be saved and loaded into other lenses. End users would be able to update firmware and can record and save maintenance history.

\*Among portable lenses for 2/3-inch 4K cameras with ENG-style design

# Canon Cinema Lens Technology

## Optical Performance

### Crystal Clear Canon Optical Technology

#### Super 35mm or Full Frame, High quality 4K/HDR

From the center to the periphery of our cinema lenses, a high-quality 4K/HDR image is achieved for both single focus and zoom lenses within the entire zoom range. Canon's optical technologies are combined to help correct various aberrations and provide high contrast while achieving a high resolution of about 80 lines/mm throughout the sensor.

### Focus Breathing Suppression

Focus breathing is caused when the focus group moves and exerts a "zooming" effect. In order to prevent this, cinema lenses implement a 3-group inner focus method and a new floating method to help minimize field angle fluctuation and achieve stable framing.

### 11 Blade Aperture

Halos from points of light at night or from rays of sunlight in shots that show the sun take on the shape of the Iris blades. The odd number of blades make the iris aperture look circular even when the Iris is contracted, enabling beautiful, round highlight bokeh.

### Warm Color Balance

Cinema lens color balance, ideal for movie production, reproduces warm skin tones. Color balance is strictly uniform across all Canon cinema lenses making lens substitution during the same scene possible. Anti-reflection film technology, including super spectral coatings and thorough corrections for slight color variations caused by glass components allow Canon lenses to achieve this effect.

### Flange Back Adjustment

A flange back adjustment mechanism is installed on the zoom lens mounts to allow for back focus adjustments.

\* Excluding EF, RF and Sumire Prime Lenses.

■ Cinema Lens Focal Distance Table

\*2: When the screen size is 24.6 × 13.8 mm.

## ■ Luminous Index

The focus index on the front lens barrels is printed with luminescent paint to improve visibility at night and in dark studio conditions.

## Dust/Splash Resistant Seals and Casing\*

Our EF, RF and Sumire Prime lenses use dust and splash resistant rubber gaskets at the casing joints.

\* Lenses are not designed to be submersible in water or exposed to heavy rain.

# Sumire Prime

Canon has introduced a line of cinema prime lenses – appropriately named “SUMIRE Prime”. Pronounced “Soo-mee-ray” in Japanese. It is associated with a floral gentleness and beauty. In addition to bright T-stops and Canon’s renowned warm imagery, a unique optical design introduces a nuanced look as the lens aperture approaches its maximum setting – subtly modifying the textural renderings of the human facial close-up. It also smooths the transition to the fall-off portions of the scene resulting in a pleasing bokeh. This combination adds emotional expressiveness to a memorable scene.

Gentle and Beautiful Skin Tone

Smooth Bokeh

 CN-E24mm T1.5 FP X  
 CN-E35mm T1.5 FP X  
 CN-E50mm T1.3 FP X  
 CN-E85mm T1.3 FP X  
 CN-E135mm T2.2 FP X

## SUMIRE PRIME Lens Series: Highlights

### Covers Full-frame, Super 35mm and APS-C Sensors

The lenses are also compatible with the large imaging area of cameras equipped with a full-size 35mm-equivalent CMOS sensor.

### Phosphorescent Indicators

To improve visibility in nighttime and dark area shooting, indicator markings with phosphorescent paint have been adopted for the front barrel (for right-side viewing).

### Artistically Pleasing Image Rendering And Warm Colors

The original lens composition with large diameter aspheric lens and anomalous dispersion glass offers more solid and artistically pleasing image rendering. This brings out the impressive image quality of 4K cinema images in all their glory. And the warm color tones have been made consistent throughout the series to artistically pleasing capture people’s facial expressions and enable better depiction of the subject’s texture.

### Minimized Focus Breathing

The lens controls focus breathing, which realizes stability in images even when bokeh effects occur due to refocusing.

### Soft, Natural Bokeh Effects

The bright T-number of the PRIME lens and multi-blade iris diaphragm produce natural blur effects closer to a circle, from maximum to minimum aperture. This enables more three-dimensional bokeh even with super wide angle lenses that have deeper depth of field, broadening the range of visual expression.

### Unified Front Lens Diameter, Gear Position

Compact Zoom and Prime lenses have the same front lens diameter and consistent gear positions, so lenses within each series can be switched without adjusting the rig setup.

### Sumire Prime Lens Series

### 11-Blade Iris

With the increased number of iris blades, users can get natural bokeh that appears more circular, from maximum to minimum aperture. The use of an odd number of blades diffuses light rays in high-brightness subjects and renders images more artistically pleasing.

### PL Mount

PL mounts, which are in high demand in the cinema market, have been adopted to support a variety of cameras used in this market.

# Flex Your Creativity

## Introducing the 8K Flex Zoom Series

CINEMA EOS

The Flex Zoom series of lenses from Canon has been designed for outstanding optical performance rendering beautiful and natural images. All Flex Zoom lenses are parfocal, and offer a constant T stop across the entire focal range. Available in EF and PL mount options in Super 35mm and Full Frame sensor formats, these lenses are swappable among all four options, putting the “flex” in Flex Zoom. Advanced Lens Metadata Support includes Cooke/i Technology™ protocol on PL mount models.

### FEATURES:

#### 8K Optical Performance with Canon Cinema EOS Color Science

The lenses produce superb color rendition and detail, with sharp images from the center to the outer edges, rated for 8K HDR capture. An 11-blade aperture creates soft, beautiful bokeh and stunning depth-of-field falloff, while an internal focusing system delivers minimized focus breathing and excellent parfocal performance. The lenses render the beautiful and warm color tones synonymous with Canon’s cinema lens family.

- Canon’s advanced optical technology and lens coatings have combined to achieve 8K optical performance through the zoom range. Various types of aberrations have been corrected to achieve beautiful imagery from the center of the image out to all edges.

- All of Canon’s cinema lenses have been designed with a consistent warm color balance that expresses skin tones beautifully, making them ideal for capturing subject textures. Color reproduction is also consistent when lenses are interchanged, which can help reduce post-production work.
- HDR video offers an expanded tonal range that represents the visual expression close to its natural image. Our 8K-compatible chromatic aberration correction reduces color bleeding, and the light-shielding design and optimized coatings reduce ghosting and flaring.
- The inner focus system reduces focus breathing, giving greater stability to framing a shot.
- The 11-blade iris gives the lenses a natural bokeh effect that is almost circular from maximum to the minimum aperture. The odd number of blades diffuse the glow of high luminance subjects for softer imaging.

#### Swappable Relay Kits

A Canon first, the Flex Zoom lenses can be swapped between Super 35mm and Full Frame imaging formats, using a relay kit (sold separately). This provides even more versatility for your productions!

## FLEX ZOOM Lens Series: Highlights

#### 8K Optical Performance with Canon Cinema EOS Color Science

The lenses produce superb color rendition and detail, with sharp images from the center to the outer edges, rated for 8K HDR capture.

#### Constant T-stop Throughout the Zoom Range

Offering a constant maximum T-stop value across the zoom range. Large aperture lenses allow for more light to reach the sensor, and the light transmission remains constant throughout the zoom range.

#### Advanced Lens Metadata Support

Compliant with a wide range of communication standards thanks to the versatile lens-to-camera communication function including Cooke/i Technology™ and Zeiss eXtended Data™ [PL mount/ Lemo 4-PIN] and EF communication [EF mount].

#### Swappable Relay Kits

Lenses can be switched between Super 35mm and Full Frame imaging formats with a relay kit (sold separately).

#### Outstanding Optics

Built for longevity, the premium design and outstanding optics and components, offer quick and precise operation, with durability ideal for professional video productions.

#### Cinema Style Operability

Weighing under 8 pounds and measuring under 10 inches long, the lenses also feature focus, zoom, and iris rings with industry standard gears and 0.8mm pitch to suit many third party follow focus accessories.

#### Attractive Bokeh

The 11-blade iris gives the lenses a natural bokeh effect that is almost circular from maximum to the minimum aperture. The odd number of blades diffuse the glow of high luminance subjects for softer imaging.

#### Available in EF Mount or Cooke/i Technology™ PL Mount Options

#### Swappable Mount Kits

Lenses can be switched between EF and PL with a mount kit (sold separately).

# Outstanding Optical Performance

## Introducing the 8K RF Prime Lens Series

The RF Cinema Prime series of lenses from Canon has been designed for outstanding optical performance rendering sharp and beautiful images. This series includes seven lenses, ideal for shooting 8K as well as HDR, and represent Canon's first cinema lenses to have a native RF mount. This lens series ushers in the RF lens communication to fully manual cinema glass, ideal for shooting with RF-mount cameras including third-party cameras that utilize a native RF mount.

The RF Cinema Prime series covers seven focal lengths, with lenses at 14, 20, 24, 35, 50, 85, and 135 millimeters and share a common gear positioning and diameter across all seven lenses.

### FEATURES:

#### RF Mount Cinema Lenses for Professional Productions

Step into cinematic filmmaking with a range of RF Cinema Prime lenses that offer ultra-fast, real-time metadata capture plus all-new features such as in-camera electronic distortion correction.

#### 8K Optical Performance with Canon Cinema EOS Color Science

Rated for 8K HDR image capture the lenses produce superb color rendition and detail, with sharp resolution from the center to the outer edges. An 11-blade iris creates soft, beautiful light rays and stunning depth-of-field falloff. The lenses render the beautiful and warm color tones synonymous with Canon's cinema lens family.

Canon's advanced optical technology and lens coatings have

combined to achieve 8K optical performance. Various types of aberrations have been corrected to achieve beautiful imagery from the center of the image out to all edges.

All of Canon's cinema lenses have been designed with a consistent warm color balance that expresses skin tones beautifully, making them ideal for capturing subject textures. Color reproduction is also consistent when lenses are interchanged, which can help minimize corrections in post.

HDR video offers an expanded tonal range that represents the visual expression close to its natural image. Our 8K-compatible chromatic aberration correction reduces color bleeding, and the light-shielding design and optimized coatings reduce ghosting and flaring.

The inner focus system reduces focus breathing, giving greater stability to framing a shot.

The 11-blade iris gives the lenses a natural bokeh effect that is almost circular from maximum to the minimum aperture. The odd number of blades diffuse the glow of high luminance subjects for softer imaging.

## RF PRIME Lens Series: Highlights

### 8K Optical Performance with HDR Support

### Peripheral Illumination, Chromatic Aberration And Distortion Correction\*

### Dual Pixel Focus Guide<sup>(\*)</sup>

### Full Frame Sensor Coverage

### Refined Ergonomics, Redefined Handling

Confidently secure your lenses without the need for an adapter when utilizing RF mount Canon Cinema EOS cameras or compatible third party cameras. With a newly developed fixed ring design, RF Cinema Prime lenses make handheld operation more comfortable, intuitive, and efficient.

### Distortion Correction

High-speed data transfer makes it possible to instantly transfer lens metadata to the camera, enabling distortion correction according to lens characteristics when shooting video with compatible cameras<sup>(\*)</sup>.

### Full Frame Creativity

The RF Cinema Prime lenses are designed for Full-Frame, Large-Format cameras, enabling impressive images using bokeh with a shallow depth of field.

### Mechanical Precision in a Compact Design

With a smooth and consistent 300-degree focus rotation, consistent gear positions, front diameter and a compact, robust and drip-proof design, offering a no-compromise lightweight solution for professional productions.

### 300-degree Focus Rotation with Phosphorescent Markings

#### RF Prime Lens Series

### 11-Blade Iris

With the increased number of iris blades, users can get natural bokeh that appears more circular, from maximum to minimum aperture. The use of an odd number of blades diffuses light rays in high-brightness subjects and renders images more artistically pleasing.

### Native RF Mount & Communication On Fully Manual Lens

\*1: With Compatible Cameras

\*2: \* Supported cameras (as of September 2023): EOS C70, EOS R5 C (Movie Mode only)

## ZOOM / COMPACT ZOOM Lens Series: Highlights

### Easy-to-Read Controls

Focus, Zoom, and Iris markings are provided on angled surfaces. These markings are easy to read from behind the camera.

### Support Industry-Standard Cameras

Covers Super 35mm and APS-C sensors.

### Light, Compact

Small and light to meet a variety of shooting needs.

### Marked on Both Sides

Lenses are marked on both sides. This makes markings visible from either side of the lens.

### Switchable Unit for Focus Marking

The outer piece on marked focus rings can be switched from non-metric to metric labeling.

### Comfortable Usability

Control rings maintain the right amount of resistance while offering exceptional usability with consistent operating torque.

### Inner Focus

Helps minimize focus-induced changes in the angle of view.

### Unified Front Lens Diameter, Gear Position

Uniform gear positions within the same categories eliminate the need for accessory gear position adjustment when switching lenses.

#### Zoom Lens Series

#### Compact Zoom Lens Series

### Flange-Back Adjustment Mechanism

A covered flange-back adjustment mechanism is included, with broadcast applications in mind.

### Attractive Bokeh

11-Blade Circular Aperture enables soft, beautiful background bokeh.

## EF PRIME Lens Series: Highlights

### Covers Full-frame, Super 35mm and APS-C Sensors

The lenses are also compatible with the large imaging area of cameras equipped with a full-size 35mm-equivalent CMOS sensor.

### Light, Compact

Small and light among many conventional cinema lenses, to meet a variety of shooting needs.

### Standard Accessories Supported

Supports industry-standard accessories such as power-drive devices and matte boxes.

### Accepts 105mm filters (except for 14mm)

PL or other individual filters 105mm in diameter can be attached to the end of the lens, enabling filter work in handheld shooting or other scenarios without using a matte box.

### Phosphorescent Indicators

To improve visibility in nighttime and dark area shooting, indicator markings with phosphorescent paint have been adopted for the front barrel (for right-side viewing).

### Fast Aperture

Enables shooting with the shallow DOF and broad bokeh that large sensors offer.

### Unified Front Lens Diameter, Gear Position

Compact Zoom and Prime lenses have the same front lens diameter and consistent gear positions, so lenses within each series can be switched without adjusting the rig setup.

#### Prime Lens Series

### 11-Blade Iris

With the increased number of iris blades, users can get natural bokeh that appears more circular, from maximum to minimum aperture. The use of an odd number of blades diffuses light rays in high-brightness subjects and renders images more artistically pleasing.

### EF Mount

Communication functions with Cinema EOS Cameras. It works seamlessly with our Cinema EOS cameras, allowing you to take full advantage of the camera's features and functionality.

### Switchable Unit for Focus Marking

The outer piece on marked focus rings can be switched from non-metric to metric labeling.

### Consistent Torque

Control Rings maintain the right amount of resistance while offering outstanding usability with consistent operating torque.

## CINE-SERVO Lens Series: Highlights

CINE-SERVO 50-1000mm  
CINE-SERVO 17-120mm

CINE-SERVO 25-250mm  
CINE-SERVO 15-120mm

**NEW** CINE-SERVO 11-55mm  
**NEW** CINE-SERVO 40-1200mm

**Robust and Durable Housing Structure**

**Support Industry-Standard Cameras**  
Covers Super 35mm and APS-C sensors.

**High Durability and Ruggedness**

**Multiple Communication Capability with Compatible Cameras**

**Ergonomic Design**

Ergonomically designed drive unit for ease of operation.

**4K Optical Performance with Canon Cinema EOS Color Science**

**Support High Quality 4K/HDR Shooting**

High optical performance with support for Super35mm large format cameras.

**High Durability and Ruggedness**

The CINE-SERVO Lenses offer the ruggedness and reliability required to fulfill the exacting needs of broadcast applications, with a robust chassis construction that is weather and shock-proof.

**Removable Servo Drive Unit**

Removable servo drive unit with various user setting capabilities.

**Accessory Connectors**

Three 20-pin connectors for externally operated accessories and a 16-bit metadata output for virtual studio systems.

**11-Blade Iris Provides Natural Bokeh**

**Designed for Cinema and Broadcast Applications**

**Compact and Lightweight**

Compact and lightweight lens available in an EF mount and PL mount that can be converted at an authorized Canon service facility.

RF mount is also available for CINE-SERVO 17-120mm, CINE-SERVO 11-55mm, and CINE-SERVO 40-1200mm.

**Built-In 1.5x Optical Extender\*1**  
Cover the image size of Full Frame.

**Supports 8K/4K Cameras**

Canon's optical technologies use large-diameter aspherical lenses and anomalous dispersion glass delivering optical performance that supports 8K cameras throughout the zoom range.

**Next-Generation e-Xs V Servo Drive Unit\*2**

Faster focus and iris speed, Focus Breathing Compensation, and a USB-C connector. The e-Xs V Drive Unit can also be detached to be used in manual-style cinema configurations.

\*1: Not available on CINE-SERVO 17-120mm  
\*2: Only available on CN7x17 KAS T/R1 and CN7x17 KAS T/PI

## COMPACT-SERVO Lens Series: Highlights

**Refined Iris Mechanism**

- Seamless Manual Control Capability
- 9-Blade Iris
- Iris Closing

**Compatible with EF-mount Cameras**

**Practical Layout of Switches**

**High Level 4K Optical Performance**

**Covers Super 35mm and APS-C Sensors**

**Image Stabilization**

**Minimized Focus Breathing**

**Supports a Wide Range of Accessories**

**Compact and Lightweight for Increased Mobility**

**Dual Pixel CMOS Auto-Focus (DAF)**

**Enhanced Servo Drive Unit**

- Servo Control Capability for all Zoom, Focus, and Iris
- Compatible with broadcast style servo lens controllers
- Optional ZSG-C10 Grip

**COMPACT-SERVO 4K**

## Drive Unit

### Removable Drive Unit

Canon CINE-SERVO lenses include a drive unit that provides the same user experience as found in our broadcast zoom lenses. Removing the drive unit allows for full manual operation of the lenses.

### ■ No Initialization

Initialization of the drive unit is not required at power-on. Initialization is required at power-on for conventional drive units. Immediate startup helps contribute to more efficient shooting.

### Compatible With Standard Broadcast Demands

#### Demand Supported

Compatible with Canon's standard broadcast industry demands such as ZSD-300D and FPD-400D. Canon's 8-pin demand\* can be connected via a conversion cable.

### Enables High-Precision, Natural Composition

#### Virtual Studio System

Three, 20-pin terminals allow a virtual connection even when zoom and focus demands are connected. The center terminal connects to a virtual studio system by relaying zoom, focus and iris positional data. Zoom and focus data are encoded by a high-precision, 16-bit encoder.

\* Iris operation is also possible by connecting FDJ-P01 via conversion cable. It will be selected as either virtual output or iris operation.

### Peripheral Illumination Correction

#### EF Mount Communication Protocol Support<sup>\*1</sup>

Information communication is possible via CINEMA EOS SYSTEM cameras and mounts. It is possible to record lens information at the time of shooting and peripheral illumination correction<sup>\*2</sup>.

\*1: ZOOM Lenses are excluded. Only EF mounted lenses are supported.

\*2: Some lenses require a camera firmware update. Some lenses are scheduled to be handled by firmware update.

### Supports Broadcast Industry Standards

#### 12-Pin Serial Communication\*

Supports 12-pin serial communication which is a broadcasting communication standard.

\* Applicable lens: CINE-SERVO Lens series.

It is necessary for the camera side to support 12 pin serial communication.

### Supports Communication Standards of Film Production Industry

#### /i Technology Compatible\*

Canon's PL-mount CINE-SERVO lenses are compatible with Cooke's "/i Technology" communication standard which has been widely adopted throughout the video production industry. Focus/zoom/aperture position data can be sent to the corresponding camera, recorded and displayed.

\* Applicable lens: PL mount lens of CINE-SERVO Lens series only.

The camera side must support /i Technology.

Communication is possible when drive unit is installed.

### Supports Virtual Production

#### RF Mount Communication Protocol Support<sup>\*1</sup>

In addition to the functions of EF Mount Communication, RF mount communication includes data for distortion and shading correction which helps improve workflow for virtual production.

#### Zeiss eXtended data Compatible<sup>\*2</sup>

An extension of the Cooke /i Technology communications standard. Also supports distortion and shading correction for virtual production.

\*1: Applicable lenses: CN7x17 KAS T/R1 when combined with supported cameras

\*2: Applicable lenses: CN7x17 KAS T/P1, CN8x15 KAS S/P1

\* Made by IDX.

※ 1: Multiple controllers can not be connected at the same time (because there is only one connector). When installing the ZSG - C10 and enabling the operation on the grip side, you can not connect the external controller.  
 ※ 2: For use in studio configurations, an optional Zacuto Z-CNYC. Y-cable can be used to connect zoom and focus controllers to each lens. This configuration allows for simultaneous zoom and focus operation with COMPACT-SERVO lenses.

※ 3: A 12-pin extension cable is required when connected the lens 12-pin cable of the expansion unit 2 and 3 (EU-V2, EU-V3) attached to cameras such as EOS C500 Mark II or EOS C300 Mark III.

※ 4: CL/127MM-H type filter Not for use with CN7x17.

### Lens System Basic Configuration

\* Some vignetting occurs when used in combination with RED's Epic system.

※ The optional Zacuto® Z-CNYC Y-cable allows for simultaneous use of zoom and focus controllers with both Compact-Servo lenses.

# 4K PTZ CAMERAS

*EXQUISITE 4K AT YOUR FINGERTIPS*

4K  
UHD

FULL HD  
1920x1080

*BROADCAST-QUALITY VIDEO*  
*INDOOR AND OUTDOOR APPLICATION*  
*FLEXIBLE CONNECTIVITY*

# FEATURES AND BENEFITS

Canon's line of professional PTZ cameras are engineered to provide the highest level of image quality and compatibility for demanding professionals in a multitude of production applications.

## >>> BROADCAST-QUALITY VIDEO

Drawing on over 80 years of imaging excellence, these cameras utilize genuine Canon lenses and a DIGIC imaging processor to provide 4K UHD video that can effortlessly match with Canon's Cinema EOS cameras to provide a uniform look to your broadcast or live stream. Common features of the 4K PTZ line of cameras include:

- Fast and precise autofocus
- Smooth on-air camera movements
- Oversampling HD processing for better looking HD video
- Built-in image stabilization
- Powerful low-light performance

## >>> FLEXIBLE CONNECTIVITY

The Canon PTZ camera lineup<sup>†</sup> offers a variety of IP connectivity possibilities, including support for Canon's XC Protocol, Standard Protocol, RTSP/RTP, RTMP/RTMPS, SRT, FreeD, and NDI HX2. Utilizing today's most popular live production protocols and streaming platforms, the cameras deliver stunning, high quality 4K video.

In addition to the various IP protocols supported, there are a variety of video features on Canon PTZ cameras that are appealing to productions of all types. HDMI and SDI outputs are vital for broadcasting, while Genlock and Timecode are key features for any multi-camera production. Select models also support the FreeD protocol for virtual set productions.

The cameras are also compatible with the Canon RC-IP100 and RC-IP1000 controllers, the Remote Camera Control Application via IP<sup>†</sup> and selected third-party controllers, making integration with existing set-ups a breeze.

<sup>†</sup>CR-X500 does not support IP or any of the IP protocols listed. Not all features available on all cameras. \*Add-on applications sold separately.

# ADD-ON APPLICATIONS

Available on Select PTZ cameras, users can install paid apps through the Add-On Applications System, and operate them within the cameras without the need for an external device.

## >>> AUTO TRACKING

The Auto Tracking Application follows a speaker and maintains their composition in the image during presentations, lectures and other events. Thanks to Canon's high-performance pan/tilt/zoom mechanism and the automatic tracking

application, the camera can smoothly capture movements of people with broadcast quality video. Auto Tracking Lite comes free of charge with supported Canon indoor cameras.

## >>> AUTO LOOP

The Auto Loop Application empowers the camera to automatically repeat pan/tilt/zoom (PTZ) staging movements ordinarily performed by camera operators during the broadcast of events, as well as TV and movie productions. "Fade mode" adjusts the speed of

the camera motions as they begin and end, enabling the automated camera system to mimic professional camerawork.

## >>> CAMERA COLOR MATCHING APPLICATION

This powerful yet easy-to-use application provides effortless color matching between the Canon CR-N700, CR-N400, and

CR-N350 PTZ camera and both Canon or third-party cameras with professional results without the need for advanced color grading skills.

## >>> MULTI-CAMERA MANAGEMENT APPLICATION

Monitor and manage up to 200 cameras direct from your PC and perform key tasks such as multi-view monitoring, device backup, assignment and registration

as well as perform firmware updates to linked cameras simultaneously.

## >>> REMOTE CAMERA CONTROL APPLICATION

Take control of your remote cameras with this free software controller, designed to operate up to 20 PTZ and Professional Video cameras over IP. Preview up to nine cameras on screen and make adjustments to focus, pan, zoom, tilt and exposure in real time, direct from your computer.

## >>> WEBCAM DRIVER

The Webcam Driver allows for compatible Canon PTZ cameras to be used as high quality webcams for teleconferencing applications.

# CANON 4K PTZ CAMERA LINEUP

INDOOR CAMERAS

## CR-N100 REMOTE CAMERA

- 1/2.3" CMOS Sensor with Hybrid Auto Focus
- High Quality 4K 30P and Full HD 60P over HDMI and IP
- 20x Optical Zoom Lens with Optical Image Stabilization
- HDMI, IP, USB Video Out
- Auto Tracking Lite Built-in
- High-precision drive mechanism for smooth, responsive PTZ performance
- Tally lamp on the front of the lens to indicate camera status at a glance
- Supports PoE+, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment
- Supports Canon's Webcam Driver
- Built-in NDI@HX2 and SRT (supports adaptive bitrate)
- Add-On Application support

## CR-N300 REMOTE CAMERA

- 1/2.3" CMOS Sensor with Hybrid Auto Focus
- High Quality 4K 30p and Full HD 60P Video Output
- 20x Optical Zoom Lens with Optical Image Stabilization
- Renowned Canon Color Science
- 3G-SDI, HDMI, IP, and USB Video Out
- Auto Tracking Lite Built-in
- Built-in NDI@HX2 and SRT (supports adaptive bitrate)
- FreeD (with multiple destination support) support for AR/VR systems
- Supports PoE+, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment

## CR-N350 REMOTE CAMERA

- 1/2.3" CMOS Sensor with Hybrid Auto Focus
- High Quality 4K 60p Video Output
- 20x Optical Zoom Lens (40x Advanced Zoom) with Optical Image Stabilization
- Renowned Canon Color Science with Support for Wide DR, Canon Log 3, HDR(HLG/PQ), EOS Standard/Neutral Image Modes
- 3G-SDI, HDMI, and IP Video Out
- Auto Tracking Lite Built-in
- Built-in NDI HX2 and SRT (supports adaptive bitrate) support
- FreeD (with multiple destination support) support for AR/VR systems
- Supports PoE++, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into virtually any Production Environment

## CR-N400 REMOTE CAMERA

- 1/2.3" CMOS Sensor with Hybrid Auto Focus
- High Quality 4K 60P Video Output
- 20x Optical Zoom Lens (40x FHD) with Optical Image Stabilization
- Renowned Canon Color Science with Support for Wide DR, Canon Log 3, HDR(HLG/PQ), EOS Standard/Neutral Image Modes
- 12G-SDI, 3G-SDI, HDMI, and IP Video Out
- Genlock, Dual XLR and 3.5mm Audio input
- Auto Tracking Lite
- Built-in Built-in NDI HX2 and SRT (supports adaptive bitrate)
- FreeD (with multiple destination support) for AR/VR systems
- Supports PoE++, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment

## CR-N500 REMOTE CAMERA

- 1" 4K UHD CMOS Sensor with Dual Pixel Autofocus
- High Quality 4K 30p and Full HD 60p Video Output
- 15x Optical Zoom Lens with Optical Image Stabilization
- Built-in ND Filter
- Renowned Canon Color Science with Support for Wide DR and Canon Log 3
- 3G-SDI, HDMI, and IP Video Out
- Genlock, Dual XLR and 3.5mm Audio input
- Auto Tracking Lite Built-in
- Built-in NDI@HX2 and SRT (supports adaptive bitrate)
- FreeD (with multiple destination support) support for AR/VR systems
- Supports PoE+, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment

## CR-N700 REMOTE CAMERA

- 1" 4K UHD CMOS Sensor with Dual Pixel Autofocus with EOS iTR AF X
- High Quality 4K 60p Video Output
- 15x Optical Zoom Lens (30x FHD) with Optical Image Stabilization
- Built-in ND Filter
- Renowned Canon Color Science with Support for Wide DR, Canon Log 3, HDR(HLG/PQ), EOS Standard/Neutral Image Modes
- 12G-SDI, 3G-SDI, HDMI, and IP Video Out
- Genlock, Dual XLR and 3.5mm Audio Input
- Auto Tracking Lite Built-in
- Built-in NDI@HX2 and SRT (supports adaptive bitrate)
- FreeD (with multiple destination support) support for AR/VR systems
- Supports PoE++, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment

## CR-X300 4K UHD FULL HD 1920x1080

REMOTE CAMERA

- 1/2.3" CMOS Sensor with Hybrid Auto Focus
- High Quality 4K 30p and Full HD 60p Video Output
- 20x Optical Zoom Lens with Optical Image Stabilization
- Renowned Canon Color Science
- Outdoor Camera with Wiper (IP65 Rated)
- 6G-SDI, HDMI, and IP Video Out
- Built-in ND1@HX2 and SRT (supports adaptive bitrate)
- Supports PoE++, variety of serial/IP control protocol support include Canon XC Protocol, Standard Control for Easy Integration into any Production Environment
- FreeD (with multiple destination support) support for AR-VR systems

## CR-X500 4K UHD FULL HD 1920x1080

REMOTE CAMERA

- 1" CMOS Sensor with Dual Pixel Autofocus
- High Quality 4K 60p Video Output
- 15x Optical Zoom Lens (30x FHD) with Optical Image Stabilization
- 12G-SDI Video Out
- Dual DIGIC DV 6 Image Processors
- Renowned Canon Color Science with Support for Wide DR and Canon Log 3 Image Modes
- Outdoor Camera with Wiper (IP55 Rated)

# REMOTE CAMERA CONTROLLERS

Control your multi-camera productions, using IP or serial control, with precision joystick, zoom rocker, and a touchscreen display.

## RC-IP100

### Remote Camera Controller

The RC-IP100 Remote Camera Controller provides IP control for up to 100 supported Canon cameras. An additional Canon camera can be controlled through the serial port. The controller is equipped with a 7" interactive touch screen and a joystick in order to pan, tilt, zoom and change camera function settings remotely. The smooth precision of the joystick allows operators to capture on-air movements with confidence.

- Control up to 100 Canon Supported cameras
- Smooth PTZ movement and Precise Control for Professional Productions
- Adjust Pan, Tilt, Zoom and Change Camera Function Settings Remotely
- Equipped with 7" diagonal Touch Screen, Control and Zoom Lever and 4 Customizable Buttons
- Supports configuration and enabling of Add-On applications, such as Auto Tracking and Auto Loop

## RC-IP300

### Remote Camera Controller

The RC-IP300 is an advanced PTZ controller enabling fast operation of multiple PTZ cameras through a tactile control interface. Featuring assignable buttons, programmable trace operation, and adjustable speed and response controls, this controller helps enable intuitive control of multiple PTZ cameras quickly and easily. With a 3.5-inch touch panel that provides clear visibility, showing operation menus and live camera video feeds, capability to control up to 200 cameras over IP, and more cutting-edge capabilities, the RC-IP300 is built for multi-camera productions.

- Compact and lightweight Fully featured remote camera controller provides smooth PTZ movement and precise control
- 3.5" touch panel for a clear display of operation screens, camera configuration, live camera views, and Touch Auto Focus
- Control up to 200 supported Canon cameras
- User assignable buttons and dials allow users to customize the controller to provide easy access to their most frequently used functions
- Adjust pan, tilt, zoom and change camera function settings remotely
- Support for multiple connected cameras to be operated and configured simultaneously
- Control lever and zoom rocker with adjustable reaction rate
- Powered by Power over Ethernet or AC Adapter (included)

## RC-IP1000

### Remote Camera Controller

The RC-IP1000 is an advanced PTZ controller enabling fast operation of multiple PTZ cameras through a newly developed control interface. Featuring 42 buttons and 14 dials, including assignable buttons, programmable trace operation, and adjustable speed and response controls, this controller helps enable intuitive control of multiple PTZ cameras quickly and easily. With a 7-inch touch panel that provides clear visibility and touchscreen control, showing operation menus and camera video feeds, capability to control up to 200 cameras over IP, and more cutting-edge capabilities, the RC-IP1000 is built for large multi-camera productions.

- Full-featured remote camera controller that supports 200 cameras and provides smooth PTZ movement and precise control
- 7" touch screen provides live video previews of up to 9 cameras per screen and supports touch auto focus
- Adjust pan, tilt, zoom and change camera function settings remotely
- Control lever and zoom rocker with adjustable reaction rate
- 4K 60P video input/output via 12G SDI
- Camera OSD menu from compatible cameras can be shown on the touch panel and operated using push-button controls
