MANAGED VULNERABILITY SERVICES

YOU CAN'T PROTECT WHAT YOU CAN'T SEE

When it comes to identifying gaps in your security posture, it's best left to the professionals.

A Managed Vulnerability Services (MVS) team is staffed with credentialed professionals who continuously identify vulnerabilities across your on-premises and cloud environments. Consider Canon's security experts an extension of your InfoSec team, providing analysis and guidance throughout the remediation process, as well as ad-hoc scanning to verify that vulnerabilities have been effectively resolved.

Discover

Executive summaries for non-technical audiences and detailed summaries for technical audiences.

Report

Monthly scans of internal assets and weekly scans of external assets.

Verify

The MVS team monitors scans for errors and accuracy.

In the U.S. alone the average cost of a data breach is

$11.50 Million[1]

Only 26% of the Cybersecurity & Infrastructure Security Agency KEVs (Known Exploited Vulnerabilities) have been fully remediated.

26%[2]
