MODERN ARCHIVING FOR MODERN TEXTUAL RECORDS

FADGI (Federal Agencies Digital Guidelines Initiative) was initiated by the National Archives and Records Administration (NARA) to establish guidance with the ultimate goal of allowing digitized materials to become the core of what we now know as digital libraries, archives, and museums.

Look around your work environment—are there cabinets, boxes, and desks full of modern documents (documents created on modern paper with well-defined printed type) that need to be archived? Whether the goal is to remove clutter, free up space, or comply with NARA Directives—or all three—a FADGI Modern Textual Records compliant Canon imageFORMULA Scanner can help you meet your archiving objectives.

The Canon FADGI Compliance Installation Package** is available for new and existing Canon imageFORMULA DR-G2110, DR-G2110 USB, DR-G2140, and DR-G2140 USB Production Document Scanners.

The FADGI conformance program relies upon well-established practices, objective measurements, and quality assurance methods designed to create accurate imaging. This program aims to reduce equipment variability, image artifacts, and other defects introduced by the scanning process and human subjectivity.

Proposed by NARA, the Modern Textual Records category refers to documents created on modern office paper. Choose Canon for a high-performance, reliable, and flexible scanning solution as part of your archival compliance and digital transformation journey.

High Performance

- Scans up to 140 pages-per-minute*
- Scans both sides of an item in a single pass
- Scans in color, black-and-white, or grayscale
- 500-item auto feeder

Reliable and Flexible

- Handle a variety of item types: business cards, ledger-sized / long / thick / thin documents, and more
- Double-feed detection helps ensure no data loss
- Durable, solid-body design with heavy-duty feed / eject trays
- USB and Ethernet connectivity (helpful for use in VDI environments)

*imageFORMULA DR 2140/DR2140 USB = 140 pages per minute. imageFORMULA DR2110/DR2110USB = 110 pages per minute.

FADGI compliance requirements are subject to updates by participating U.S. Federal Agencies. Visit www.digitizationguidelines.gov for the latest FADGI requirements and information.

**To enable FADGI compliance, the scanner's driver settings may need to be changed, and Canon CaptureOnTouch software must be installed on the customer's workstation that is connected to the scanner. The firmware may affect the scanning speed of the scanner.
