

MOBILE PRINT SOLUTION FOR COMPATIBLE CANON MULTIFUNCTION OFFICE PRODUCTS

On-Demand Mobile Printing. MEAP Print Application. Convenience Printing.

FIERY PRINTME

Easy and Convenient Mobile Print Solution*

The rapid increase in consumers using their mobile devices for business purposes is driving the need for print functionality in those devices. To print from these—and even laptops for mobile workers—has long been a challenge. It required special printing applications, special printers for particular devices, or new printer drivers. In other cases, one would need to transfer files to mediums such as USB drives or create online storage accounts. Still some mobile workers had to wait to get back to their desks to print their documents. But that was then.

Fiery's MEAP® application, Fiery PrintMe, changes all that. The MEAP application makes mobile printing from smartphones, tablets, and laptops as easy as sending an email. Users can conveniently send documents from their mobile devices through Fiery's PrintMe Service via print@PrintMe.com, through PrintMe.com, print driver, or mobile app for output on Canon multifunction office products (MFPs).

FIERY PRINTME: HOW IT WORKS

Overview

User sends files to Fiery's PrintMe Service from a mobile device, laptop, or desktop computer. User doesn't need an account.

- User receives a return email containing a release code.
- User selects the PrintMe icon on the Main Menu of the compatible Canon MFP's front-panel display.
- User enters the release code.
- User selects the number of copies, color or black-and-white, and single- or double-sided printing.
- User selects "Print."

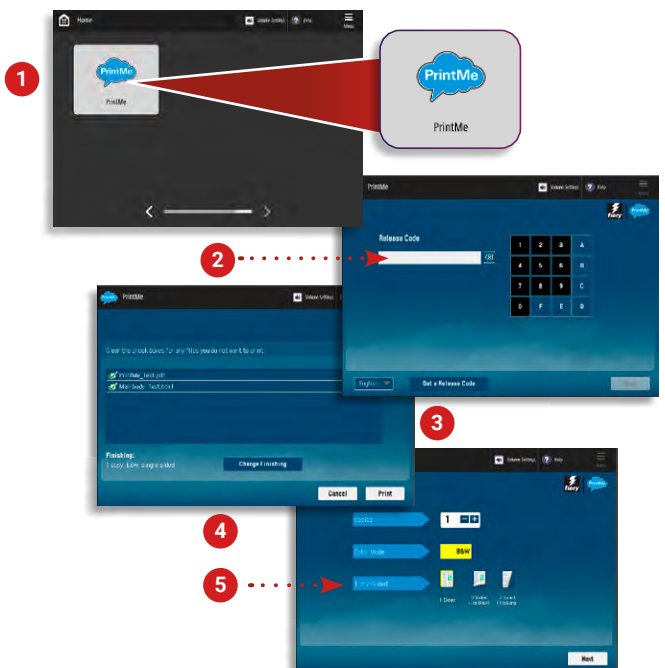

Sending Files

User can send files from their mobile devices to print four different ways.

- **Send by email:**
 - User sends an email with files to be printed as attachments to print@PrintMe.com.
 - User receives a return email containing a release code.
- **Send by Web upload:**
 - User visits PrintMe.com.
 - User uploads one or multiple supported files to PrintMe.com.
 - User receives a release code via the Web page and email, if an email was provided.
- **Send by PrintMe Windows® or MAC drivers:**
 - User downloads PrintMe driver from PrintMe.com.
 - User prints by selecting File > Print > from any application.
 - User receives a release code from the driver dialog box and via email, if email was provided.
- **Send by iOS and Android PrintMe Mobile apps:**
 - User sends files to PrintMe via send or share functions.
 - User receives a release code in the app.

Printing Files on Canon MFPs

- 1 User selects the Fiery PrintMe icon on the Main Menu of the compatible MFP's front-panel display.
- 2 User enters the PrintMe release code and presses "Next."
- 3 Fiery PrintMe retrieves the file from the PrintMe Service.
- 4 User selects the file(s) to print.
- 5 User can change finishing options; the number of copies; color or black and white; single- or double-sided printing; and then selects "Print."

LEVERAGE MOBILE PRINT IN THE OFFICE

Fiery PrintMe is a mobile print solution that allows users to print from their mobile devices directly to compatible Canon MFPs.*

For Mobile Device Users

Fiery PrintMe provides an easy way for mobile device users to send documents through Fiery's PrintMe Service for output on compatible devices in both corporate and public facilities. Mobile users need little IT support to get started.

Helps Empower Office Workers

In corporations, Fiery PrintMe can provide employees, contractors, and guests with mobile printing capabilities for documents previously uploaded to Fiery's PrintMe Service.

- Employees working on another floor or in a different building on campus can easily print, regardless of location.
- Traveling employees visiting another company site can print directly without needing to find network printers, install printer drivers, or ask for IT assistance.
- Remote employees, such as sales people, can quickly print when at the office.
- Anyone who needs "on-demand" printing can specify where and when to print.
- Visitors or contract workers without access to the company internal network can also print securely.

Convenience Printing

The Fiery PrintMe solution accommodates mobile professionals who need to remotely print documents, and fulfills the need for a convenient, easy-to-use mobile printing solution.

FIERY PRINTME

Supported File Formats

- PDF, text documents
- Microsoft® Office (Word, Excel, PowerPoint, Publisher)
- Images (BMP, JPEG, PNG, GIF, TIFF)
- Webpages

Supported Mobile Platforms

Smartphones and tablets, including:

- Apple® iOS
- Google Android™ OS

File Size Limit

File size depends on the method used for uploading the file to the PrintMe service:

- Email uploads are limited by the email service provider. Typically, providers allow emails of up to 25 MB.
- This website allows uploads of files up to 70 MB each.
- The PrintMe drivers for Windows® and Mac allow uploads of files up to 70 MB each.

Canon MFP Requirements

- Direct Print Kit or PS Printer Kit is required.
- Additional Memory Type B may be required on certain Canon MFPs.
