

MANAGED VULNERABILITY SCANNING

Uncover Hidden Risks

Strengthen Your Cyber Defenses Before Hackers Strike

In today's digital landscape, every organization—large or small—is a target. Cybercriminals don't discriminate; they seek out the easiest way in, and often, that's an unpatched or unknown vulnerability in your network. Vulnerability scanning is your first line of defense, designed to detect weaknesses before they're exploited. By regularly scanning internal and external systems, organizations can proactively identify, assess, and resolve security risks—helping to save time, money, and reputations.

Vulnerability Scanning for All

Managed Vulnerability Scanning is a comprehensive solution that empowers organizations to actively scan and secure their environments without the high costs or complexity of managing traditional enterprise tools themselves. Whether you have a single network or hundreds of intra-connected sites, Managed Vulnerability Scanning Services help to deliver the clarity, automation, and scalability you need. This can be extremely helpful to overloaded InfoSec teams, as well as necessary third-party vulnerability services assessments for organizations in regulated industries.

Why Choose Managed Vulnerability Scanning?

Full-Spectrum Vulnerability Management

- Turnkey managed **internal and external scanning program** across your networks—automatically or on-demand.
- Identify and prioritize potential threats using **Common Vulnerabilities and Exposures (CVE)** IDs.
- Enable **authenticated scans** for deep inspection of systems and devices.

Fast Setup & Smart Automation

- Deploy scanners quickly with configuration done on your behalf.
- Schedule scans with **custom profiles** (Low Impact, Standard, Comprehensive).
- Automatically generate **service tickets** for discovered vulnerabilities.

Management Flexibility

- Your organization can have as much or little involvement in the scanning as you'd like—we can manage completely, or give you access to run scans on demand.

Actionable Results, Not Data Overload

- Filtered alerts based on severity or device range allow for fast remediation.
- Track effectiveness of fixes and demonstrate compliance with comprehensive reports.

Benefits You Can Count On

Managed Vulnerability Scanning can help you:

Save Time

Automate regular scans and alerts to help eliminate manual overhead.

Stay Secure

Get ahead of attackers with real-time threat detection and remediation.

Improve Compliance

Generate tailored reports for stakeholders or auditors.

Reduce Risk

Help maximize your ROI on vulnerability management by ensuring you tackle high-risk items first.

Protect What Matters. Scan Smarter.

Whether you're a growing business or a busy IT department, Managed Vulnerability Scanning can give you the peace of mind to uncover vulnerabilities before attackers do—in an affordable and turnkey solution.
