

Monitor. Detect. Respond: Three key actions to help avoid a data breach.

Your organization has just been hit by a data breach. How did the hackers get in? What's the damage? How fast can your security team respond? And what could you have done to prevent the intrusion? Before you're faced with questions like these, learn how Managed Detection and Response can help protect your digital assets.

MANAGED DETECTION AND RESPONSE

A turnkey service that helps predict, prevent, detect, and respond to malicious activity.

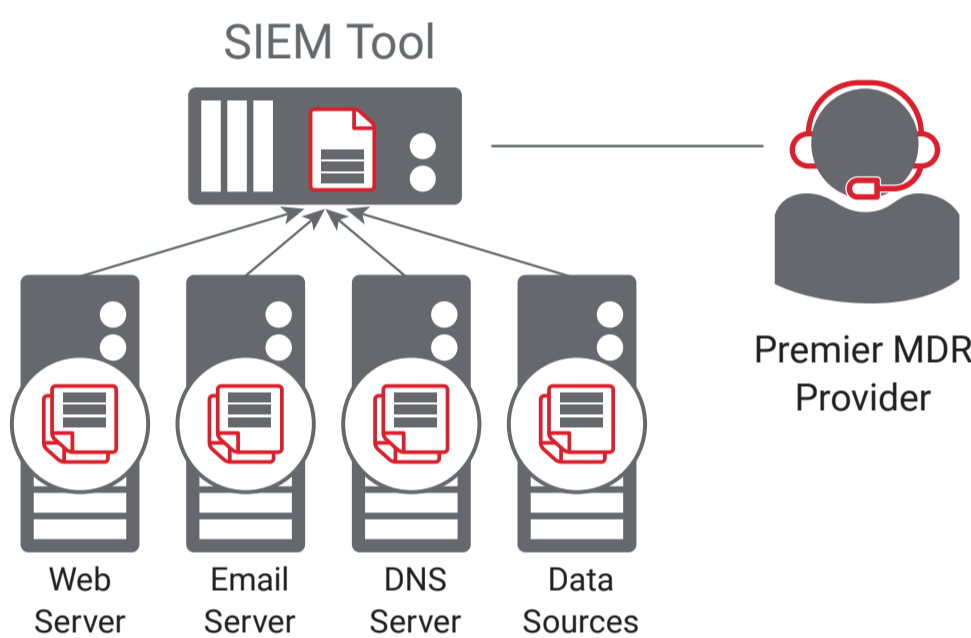

4 Key Benefits of MDR

- 1 // PROACTIVE MONITORING**
MDR is designed to watch your network 24/7 and send you automated security reports.
- 2 // COORDINATED RESPONSE**
In the event of a security incident, MDR teams are ready to act immediately.
- 3 // BATTLE-TESTED EXPERTS**
You get skilled cybersecurity professionals without having to hire them.
- 4 // DELIVERED AS A SERVICE**
Your costs are predicable and there's no capital investment involved.

How It Works

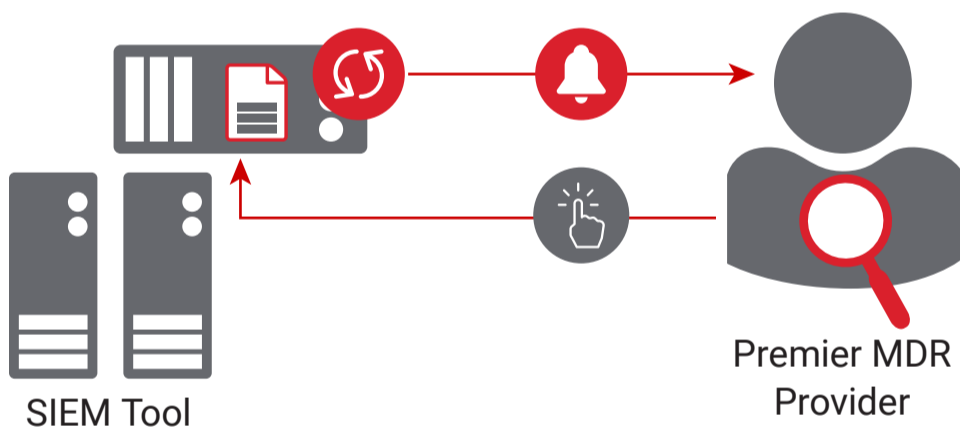

Stage 1 - Deployment phase

Security Information and Event Management (SIEM) software is installed to provide logs of event data from across the network

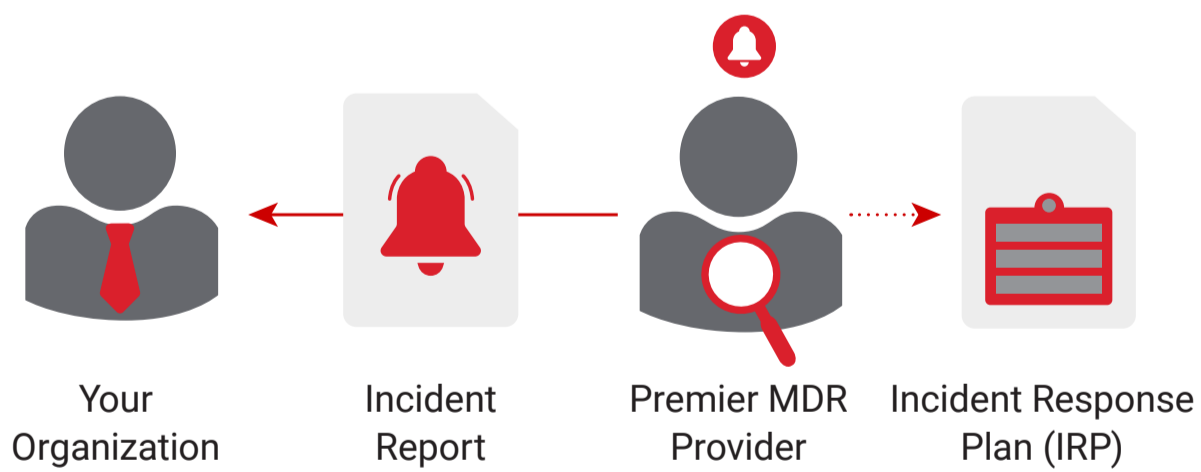

Stage 2 - Monitoring phase

Incidents are analyzed using SIEM event data

Stage 3 - Incident Response

Security Analysts respond to the incident and provide Incident Reporting

“An Incident Response Management plan is key to all areas of security.”
