Solution for Auditing
and Fleet Management

SITEAUDIT VISUALIZER™

To maximize printer utilization, use SiteAudit Visualizer for audit or ongoing MPS optimization analysis. Using printer icons provides a graphical analysis of where to place printer assets—to existing or newly created floor plans. These printer icons represent data collected by SiteAudit. Show volume use and utilization of printers and aggregate printers to show them by groups or by total printer use. Visualize overused or underused printers so that they can be redeployed for optimal use. Use your PC tablet and easily drag printers from the Inventory Explorer to a floor plan. Do it during an audit walk-through or anytime SiteAudit data is available.

Visualizer utilizes SiteAudit collected data to map printers to floor plans and creates critical TCO analysis.

Visualizer

- Use Tablet Mobility and Map Printer assets
- Group printers by locations to show volume and utilization
- Display over and under-utilized printers
- Aggregate printers to display total volumes
- Easily drag and drop printers to floor plans
- Integrated tool for data collecting and mapping

SiteAudit Visualizer
runs on Windows®
tablets and
workstations.

Key Benefits

- Creating printer floor plans is easy to do and saves cost over manually produced printer maps
- The most accurate and comprehensive printer data available for mapping analysis
- Printer activity is visualized on floor plans to formulate volume and utilization Total Cost Analysis (TCO)
- Ensures compatibility to current and ongoing data collections while lowering the learning curve cost

Key Features

- Inventory Explorer provides data filtering; drag-and-drop mapping operations
- SiteAudit audit and fleet management data automatically links to printer icons
- Printer icons contain asset, volume, and utilization data
- Integrates with SiteAudit audit and fleet management tools

Inventory Explorer: Filter printers then drag-and-drop printers to floor map.

Display their aggregate volumes: Total, Total B/W, and Total Color.

Select and drag printers to floor plans, then group them.

NETAPHOR SITE AUDIT IS ONE OF MANY TOOLS UTILIZED IN CANON'S MDS PROGRAM

Recognized as a Leader in the IDC WorldWide Contractual Managed Print & Document Services MarketScape Hardcopy 2018-2019, Canon Managed Document Services (MDS) is a unified offering for total output and information management solutions. It consists of complete program customization within the desired time frame, specific to a company's unique business needs. From the printed page to the electronic document, Canon provides a portfolio of custom products, solutions, services, and subject matter experts. All these help businesses achieve their goals for cost reduction, improved serviceability, support, information accessibility and, most of all, to help them treat information as an asset.

USA.CANON.COM

LET CANON HELP PUT YOU ON A PATH TO SUCCESS

No matter what your current managed print abilities, Canon can help bring your skills to the next level. Its robust MDS program offers tools and training options that can help get you up to speed quickly and with very little investment. You can leverage the MDS program as your complete, end-to-end solution or adopt individual components that fill in the gaps in your existing solution. Canon tools can not only help elevate the managed print program you have in place today, but they can also help you to meet your needs as business processes continue to evolve. From basic fleet management and service automation for TCO reduction to providing advanced services for more complex information workflows, Canon brings the expertise, people, technology, solutions, and services you need to understand your business and manage your environment.
